Gates County

2018 Community Health Needs Assessment
Dear Community Member,

Your partnership in the Community Health Needs Assessment process is important to the health of our residents. Albemarle Regional Health Services, Sentara Albemarle Medical Center, Vidant Bertie Hospital, Vidant Chowan Hospital, Vidant Roanoke Chowan Hospital, and numerous other community partners continue to work together to provide this comprehensive report which illustrates the health status, health needs and improvements, as well as health resources in our communities. This document represents much time and effort by local health department staff, hospital staff, Healthy Carolinians members, and community members like you.

The rural landscape of our counties and the diversity of our population continue to make the Albemarle region an exciting place to live, work, and play. These factors also provide challenges in our systems of service delivery which drive the need for a continuum of programs. The Community Health Needs Assessment allows us the opportunity to analyze and prioritize our community’s needs and strengths based on vital feedback from citizens of all eight counties.

The priority health rankings selection process identified strategies that can be implemented to target needs that were identified in the 2018 Community Health Needs Assessment. These priorities can help to create increased opportunities for healthier outcomes in our communities. Existing relationships will continue to be nurtured and strengthened as we join together to identify new partners to innovatively address the needs of our community.

Thank you for your continued interest in the health of our communities.

Sincerely yours,

R. Battle Betts, Jr., MPA
Health Director
Albemarle Regional Health Services
Acknowledgements

This report is the culmination of significant work led by Albemarle Regional Health Services, Sentara Albemarle Medical Center, Vidant Chowan Hospital, Vidant Bertie Hospital, Vidant Roanoke Chowan Hospital, and Vidant Health, in conjunction with key stakeholders from the community.

Support of this document was also provided by many other entities. Albemarle Regional Health Services, Sentara Albemarle Medical Center, Vidant Chowan Hospital, Vidant Bertie Hospital, Vidant Roanoke Chowan Hospital, and Vidant Health greatly appreciates the help of our vital community stakeholders.

Special thanks goes to Ashley Mikus for proofing/editing this document.

Executive Summary
Albemarle Regional Health Services and community partners are pleased to present the 2018
Community Health Needs Assessment. This report provides an overview of the methods and process
used to identify and prioritize significant health needs in Gates County.

Service Area
The service area for this report is defined as the geographical boundary of Gates County, North Carolina.
Gates County is located in the northeast corner of the state and has a total area of 346 square miles, of
which 340 square miles is land and 5.2 square miles is water.

Methods for Identifying Community Health Needs
Secondary Data
Secondary data used for this assessment were collected and analyzed from Conduent HCI’s community
indicator database. The database, maintained by researchers and analysts at Conduent HCI, includes
over 100 community indicators from various state and national data sources such as the North Carolina
Department of Health and Human Services, the Centers for Disease Control and Prevention and the
American Community Survey. See Appendix A for a full list of data sources used.

Indicator values for Gates County were compared to North Carolina counties and U.S. counties to
identify relative need. Other considerations in weighing relative areas of need included comparisons to
North Carolina state values, comparisons to national values, trends over time, Healthy People 2020
targets and Healthy North Carolina 2020 targets. Based on these seven different comparisons, indicators
were systematically ranked from high to low need. For a detailed methodology of the analytic methods
used to rank secondary data indicators see Appendix A.

Primary Data
The primary data used in this assessment consisted of (1) a community survey distributed through
online and paper submissions and (7) focus group discussions. Over 300 Gates County residents
contributed their input on the community’s health and health-related needs, barriers, and
opportunities, with special focus on the needs of vulnerable and underserved populations.

See Appendix B for all primary data collection tools used in this assessment.

Summary of Findings
The CHNA findings are drawn from an analysis of an extensive set of secondary data (over 100 indicators
from national and state data sources) and in-depth primary data from community leaders, health and
non-health professionals who serve the community at large, vulnerable populations, and populations
with unmet health needs. Through a synthesis of the primary and secondary data the significant health
needs were determined for Gates County and are displayed in Table 1.

**Selected Priority Areas**

The prioritization process identified three focus areas: (1) Access to Healthcare Providers (2) Physical Activity and Nutrition/Chronic Disease Prevention and (3) Substance Misuse/Mental Health.

**Conclusion**

This report describes the process and findings of a comprehensive health needs assessment for the residents of Gates County, North Carolina. The prioritization of the identified significant health needs will guide community health improvement efforts of Gates County. Following this process, Albemarle Regional Health Services and community partners will outline how they plan to address the prioritized health needs in their community improvement plans.
Introduction

Albemarle Regional Health Services and community partners are pleased to present the 2018 Community Health Needs Assessment, which provides an overview of the significant community health needs identified in Gates County, North Carolina.

The goal of this report is to offer a meaningful understanding of the most pressing health needs across Gates County, as well as to guide planning efforts to address those needs. Special attention has been given to the needs of vulnerable populations, unmet health needs or gaps in services, and input gathered from the community.

Findings from this report will be used to identify, develop and target initiatives to provide and connect community members with resources to improve the health challenges in their communities.

The 2018 Community Health Needs Assessment was developed through a partnership between Albemarle Regional Health Services, Sentara Albemarle Medical Center, Health ENC and Conduent Healthy Communities Institute, with The Duke Endowment serving as the fiscal sponsor.

About Health ENC

Initiated in 2015 by the Office of Health Access at the Brody School of Medicine at East Carolina University, Health ENC grew out of conversations with health care leaders about improving the community health needs assessment (CHNA) process in eastern North Carolina. Health ENC, now a program of the Foundation for Health Leadership and Innovation (FHLI), coordinates a regional CHNA in 33 counties of eastern North Carolina. In addition, the Health ENC Program Manager works to build coalitions and partnerships that will address health issues identified through the regional CHNA process.

As part of the Affordable Care Act, not for profit and government hospitals are required to conduct CHNAs every three years. Similarly, local health departments in North Carolina are required by the Division of Public Health (DPH) in the NC Department of Health and Human Services (DHHS) to conduct periodic community health assessments as well. Local health departments have been required to submit their community health needs assessments once every four years. The particular year CHNA submissions are made by hospitals within a three-year cycle or by local health departments within a four-year cycle is not uniform across the state or region.

Additionally, although local health departments and hospitals have guidance from their respective oversight authorities on how to conduct and report the results of their CHNAs, that guidance allows for wide variations in the execution of these reports. The methodologies, specific data items gathered, the interpretation of the data as well as the general approach and scope of one CHNA may have little resemblance to a CHNA in another jurisdiction or conducted by another organization.

For these reasons, health care leaders across eastern North Carolina have partnered to standardize the CHNA process for health departments and hospitals in the region. This effort will also sync all participant organizations on to the same assessment cycle. Combining efforts of local health departments and hospitals in a regional CHNA will ultimately lead to an improvement in the quality and utility of population health data, the ability to compare and contrast information and interventions across geographic boundaries, and the reduction of costs for everyone involved, while maintaining local control and decision-making with regard to the selection of health priorities and interventions chosen to
address those priorities. Simultaneously, it will create opportunities for new and better ways to collaborate and partner with one another.

Upon receipt of generous funding support provided by The Duke Endowment, the Office of Health Access at ECU’s Brody School of Medicine transferred administrative and operational responsibility for Health ENC to the Foundation for Health Leadership and Innovation in 2018. The project continues to be guided by a steering committee representing local health departments, hospitals and other stakeholders committed to improving the health of the people of eastern North Carolina.

**Member Organizations**
Health ENC is comprised of more than 40 organizations. Twenty-two hospitals, twenty-one health departments and two health districts participated in the regional CHNA.

**Partner Organizations**
- Foundation for Health Leadership & Innovation
- ECU Brody School of Medicine
- The Duke Endowment

**Hospitals and Health Systems**
- Cape Fear Valley Health (Cape Fear Valley Medical Center, Hoke Hospital and Bladen County Hospital)
- Carteret Health Care
- Halifax Regional Medical Center
- Johnston Health
- UNC Lenoir Health Care
- Nash Health Care System
- Onslow Memorial Hospital
- The Outer Banks Hospital
- Pender Memorial Hospital
- Sampson Regional Medical Center
- Sentara Albemarle Medical Center
- Vidant Beaufort Hospital
- Vidant Bertie Hospital
- Vidant Chowan Hospital
- Vidant Duplin Hospital
- Vidant Edgecombe Hospital
- Vidant Medical Center
- Vidant Roanoke-Chowan Hospital
- Wayne UNC Health Care
- Wilson Medical Center

**Health Departments and Health Districts**
- Albemarle Regional Health Services
- Beaufort County Health Department
- Bladen County Health Department
- Carteret County Health Department
• Cumberland County Health Department
• Dare County Department of Health and Human Services
• Duplin County Health Department
• Edgecombe County Health Department
• Franklin County Health Department
• Greene County Department of Public Health
• Halifax County Public Health System
• Hoke County Health Department
• Hyde County Health Department
• Johnston County Public Health Department
• Lenoir County Health Department
• Martin-Tyrrell-Washington District Health Department
• Nash County Health Department
• Onslow County Health Department
• Pamlico County Health Department
• Pitt County Health Department
• Sampson County Health Department
• Wayne County Health Department
• Wilson County Health Department

Steering Committee
Health ENC is advised by a Steering Committee whose membership is comprised of health department and hospital representatives participating in the regional CHNA, as well as other health care stakeholders from eastern North Carolina. The program manager oversees daily operations of the regional community health needs assessment and Health ENC.

Health ENC Program Manager
• Will Broughton, MA, MPH, CPH - Foundation for Health Leadership & Innovation

Health ENC Steering Committee Members
• Constance Hengel, RN, BSN, HNB-BC - Director, Community Programs and Development, UNC Lenoir Health Care
• James Madson, RN, MPH - Steering Committee Chair, Health Director, Beaufort County Health Department
• R. Battle Betts, Jr., MPA - Health Director, Albemarle Regional Health Services
• Caroline Doherty - Chief Development and Programs Officer, Roanoke Chowan Community Health Center
• Melissa Roupe, RN, MSN - Sr Administrator, Community Health Improvement, Vidant Health
• Davin Madden – Health Director, Wayne County Health Department
• Angela Livingood – Pharmacy Manager, Pender Memorial Hospital
• Lorrie Basnight, MD, FAAP - Executive Director, Eastern AHEC, Associate Dean of CME, Brody School of Medicine
• Anne Thomas- President/CEO, Foundation for Health Leadership & Innovation
HealthENC.org
The Health ENC web platform, shown in Figure 1, is a resource for the community health needs assessment process in eastern North Carolina. The website serves as a “living” data platform, providing public access to indicator data that is continuously updated, easy to understand and includes comparisons for context. Much of the data used in this assessment is available on HealthENC.org and can be downloaded in multiple formats. Results of the 2018 Eastern North Carolina Community Health Survey can be downloaded by county or the entire Health ENC Region.

In addition to indicator data, the website serves as a repository for local county reports, funding opportunities, 2-1-1 resources and more. Health departments, hospital leaders and community health stakeholders in the 33-county region are invited to use the website as a tool for community assessment, strategic planning, identifying best practices for improvement, collaboration and advocacy.

Visit HealthENC.org to learn more.

Figure 1. Health ENC Online Data Platform

The Health ENC web platform is a resource for the community health needs assessment (CHNA) process in eastern North Carolina and is a program of the Foundation for Health Leadership and Innovation (FHLI). Health departments and hospital leaders in the 33 county region are invited to use the site as a tool for community assessment, strategic planning, identifying best practices for improvement, collaboration and advocacy.
**Consultants**

Health ENC commissioned Conduent Healthy Communities Institute (HCI) to assist with its Community Health Needs Assessment.

Conduent Healthy Communities Institute is a multi-disciplinary team of public health experts, including healthcare information technology veterans, academicians and former senior government officials, all committed to help health-influencing organizations be successful with their projects. Conduent HCI uses collaborative approaches to improve community health and provides web-based information systems to public health, hospital and community development sectors, to help them assess population health.

Conduent HCI works with clients across 38 states to drive improved community health outcomes by assessing needs, developing focused strategies, identifying appropriate intervention programs, establishing progress monitoring systems, and implementing performance evaluation processes. Working with diverse clients nationwide has contributed to Conduent HCI’s national knowledge base of population health solutions. In addition, by engaging directly with clients and communities through the primary data collection process and final workshops, Conduent HCI works on behalf of our clients to build trust between and among organizations and their communities.

Community CHNA Collaborative

This document was developed by Albemarle Regional Health Services, in partnership with Sentara Albemarle Medical Center, Vidant Bertie Hospital, Vidant Chowan Hospital, and Vidant Roanoke Chowan Hospital as part of a local community health needs assessment process.

Gates Partners for Health (GP4H) was also an active partner in the development of the CHNA. GP4H is “a network of public-private partnerships across North Carolina that shares the common goal of helping all North Carolinians to be healthy.” The members of local partnerships are representatives of the agencies and organizations that serve the health and human service needs of the local population, as well as representatives from businesses, communities of faith, schools and civic groups.

Community Health Team Structure

For the CHNA, Albemarle Regional Health Services developed a CHNA Leaders Team to help lead the process. The CHNA Leaders Team consisted of 25 members that included county residents as well as representatives from various local agencies and organizations throughout the eight county service area. The CHA Leaders Team members brought a wealth of knowledge and expertise on a variety of issues and populations in the county, and the broad range of backgrounds ensured objectivity throughout the prioritization process. The CHA Leaders Team met three times between April 2018 and July 2018 to review strategies for conducting primary data collection for the CHNA, stay informed of the process, and provide feedback.

Collaboration between Albemarle Regional Health Services and other local partners made this assessment possible. Many collaborators spent numerous hours attending meetings, collecting survey data, promoting and serving as moderators for focus group discussions, and attending presentations. These partners also played an active role in the priority selection process.

Partners in the 2018 CHNA process for Albemarle Regional Health Services include:
- Albemarle Hospital Foundation
- Albemarle Regional Health Services
- Gates Partners for Health
- Healthy Carolinians of the Albemarle
- Pasquotank County Cooperative Extension
- Sentara Albemarle Medical Center
- Three Rivers Healthy Carolinians
- Town of Hertford
- Vidant Bertie Hospital
- Vidant Chowan Hospital
- Vidant Roanoke Chowan Hospital

Local Healthy Carolinians partnerships utilized grass root efforts to ensure community citizen’s opinions were heard and demographic characteristics of participants were considered to ensure that results portrayed an accurate representation of each county as a whole.
Distribution

Gates Partners for Health plans to share results from the Community Health Needs Assessment (CHNA) during meetings to county and city governments, local civic groups, faith organizations, business leaders, and through other community outreach events. The CHNA documents can be found on the Albemarle Regional Health Services website at www.arhs-nc.org. Efforts will be made with other agencies and local government, including county websites, to provide links to the information. ARHS also plans to work with the local newspapers to provide news releases to the public about the findings made in each county. GP4H members will have access to the information found in the CHNA at their disposal to use in the community including evidence-based strategies, grant proposals, and program planning and implementation.

An electronic copy of this report is also available on HealthENC.org.
Methodology

Overview
Two types of data are analyzed for this Community Health Needs Assessment: secondary data and primary data. Secondary data is data that has been collected from other sources while primary data has been collected directly as a part of this report. Each type of data is analyzed using a unique methodology, and findings are organized by health topic areas. These findings are then synthesized for a comprehensive overview of the health needs in Gates County.

Secondary Data Sources & Analysis
The main source of the secondary data used for this assessment is HealthENC.org, a web-based community health platform developed by Conduent Healthy Communities Institute. The Health ENC dashboard brings non-biased data, local resources, and a wealth of information in one accessible, user-friendly location. The secondary data analysis was conducted using Conduent HCI’s data scoring tool, and the results are based on the 132 health and quality of life indicators that were queried on the Health ENC dashboard on July 18, 2018. The data are primarily derived from state and national public data sources. For each indicator on the platform, there exist several comparisons to assess Gates County’s status, including how Gates County compares to other communities, whether health targets have been met, and the trend of the indicator value over time.

Conduent HCI’s data scoring tool systematically summarizes multiple comparisons to rank indicators based on highest need (Figure 2). For each indicator, the Gates County value is compared to a distribution of North Carolina and U.S. counties, state and national values, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over the four most recent time periods of measure. Each indicator is then given a score based on the available comparisons. The scores range from 0 to 3, where 0 indicates the best outcome and 3 indicates the worst outcome. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected from other communities, and changes in methodology over time. The indicators are grouped into topic areas for a higher-level ranking of community health needs.

Please see Appendix A for further details on the secondary data scoring methodology.

Health and Quality of Life Topic Areas
Table 2 shows the health and quality of life topic areas into which indicators are categorized. These topic areas are broadly based on the Healthy People 2020 framework, with each topic area containing

---

1 Health ENC is an online platform that provides access to health, economic and quality of life data, evidence-based programs, funding opportunities and other resources aimed at improving community health. The platform is publicly available and can be accessed at [http://www.healthenc.org/](http://www.healthenc.org/).
multiple indicators. The five topic areas exhibiting the most significant need as evidenced by the secondary data analysis are included for in-depth exploration in the data findings. Four topic areas specific to population subgroups, including Children’s Health, Men’s Health, Women’s Health, and Older Adults & Aging, include indicators spanning a variety of topics. If a particular subgroup receives a high topic score, it is not highlighted independently as one of the top 5 findings, but is discussed within the narrative as it relates to highly impacted populations. Three additional categories (County Health Rankings, Mortality Data, and Wellness & Lifestyle) are not considered for in-depth exploration, since all three are general categories that include indicators spanning a wide variety of topics. Topic areas with fewer than three indicators are considered to have data gaps and do not receive topic scores. These topics are indicated by an asterisk in Table 2.

Health ENC Region Comparison

When available, county-level data are compared to the state of North Carolina, as well as Health ENC Counties. The Health ENC region consists of 33 counties in eastern North Carolina participating in the regional CHNA: Beaufort, Bertie, Bladen, Camden, Carteret, Chowan, Cumberland, Currituck, Dare, Duplin, Edgecombe, Franklin, Gates, Greene, Halifax, Hertford, Hoke, Hyde, Johnston, Lenoir, Martin, Nash, Onslow, Pamlico, Pasquotank, Pender, Perquimans, Pitt, Sampson, Tyrrell, Washington, Wayne and Wilson. Values for the Health ENC region were calculated by aggregating data from these 33 counties.

Primary Data Collection & Analysis

To expand upon the information gathered from the secondary data, Health ENC Counties collected community input. Primary data used in this assessment consists of focus groups and both an English-language and Spanish-language community survey. All community input tools are available in Appendix B.

Community Survey

Community input was collected via a 57-question online and paper survey available in both English and Spanish. Survey Monkey was the tool used to distribute and collect responses for the community survey. Completed paper surveys were entered into the Survey Monkey tool.
The community survey was distributed across Health ENC’s entire survey area from April 18, 2018 – June 30, 2018.

**Survey Distribution**

Members of the ARHS CHNA Leaders Team, assisted by members of the region’s Healthy Carolinians coalitions and community volunteers, conducted the community health survey using electronic/paper surveys and a “convenience sample” technique. Surveys were taken to places where people were gathered for other purposes, for example, meetings, workplaces, waiting rooms, community events, etc. The sample sites were deliberately chosen to assure that the participants would be representative of the demographic distribution of the community in each participating county. Surveys, which were available in English and Spanish versions, were distributed and retrieved by the volunteers in one sitting. Surveys plainly stated, and participants were reminded, that their responses would be confidential and not linked to them personally in any way.

Table 3 summarizes the number of survey respondents. A total of 18,917 responses were collected across all 33 counties, with a survey completion rate of 86.5%, resulting in 16,358 complete responses across the entire survey area. A total of 301 responses were collected from Gates County residents, with a survey completion rate of 84.7%, resulting in 255 complete responses from Gates County. The survey analysis included in this CHNA report is based on complete responses.

*Based on complete responses

Survey participants were asked a range of questions related - but not limited - to: what populations are most negatively affected by poor health outcomes in Gates County, what their personal health challenges are, and what the most critical health needs are for Gates County. The survey instrument is available in Appendix B.
Demographics of Survey Respondents
The following charts and graphs illustrate Gates County demographics of the community survey respondents.

Among Gates County survey participants, 53% of respondents were over the age of 50, with the highest concentration of respondents (14.2%) grouped into the 50-54 age group. The majority of respondents were female (85.3%), White (74.9%), spoke English at home (99.6%), and Not Hispanic (97.6%).

Survey respondents had varying degrees of education, with the highest share of respondents (22.6%) having an associate’s degree or vocational training and the next highest share of respondents (22.2%) having a bachelor’s degree (Figure 3).
As shown in Figure 4, more than half of the respondents were employed full-time and the highest share of respondents (23.6%) had household annual incomes $50,000-$74,999 before taxes. The average household size was 2.9 individuals.

Figure 4. Employment Status of Community Survey Respondents
Figure 5 shows the health insurance coverage of community survey respondents. More than half of survey respondents have health insurance provided by their employer (54.4%) while 19.8% have Medicare and 4.4% have no health insurance of any kind.

![Figure 5. Health Care Coverage of Community Survey Respondents](image)

Key findings from select questions on the community survey are integrated into this report by theme or topic area, with an emphasis on the most significant needs as evidenced by both primary and secondary data. This approach is intended to offer a meaningful understanding of health needs. A summary of full survey results (all 57 questions) is available on HealthENC.org. Full results can be downloaded by county or for the entire Health ENC Region.

Focus Group Discussions

Another form of community input was collected through focus groups. Focus groups are carefully constructed dialogues that invite diverse groups of people to discuss important and pressing issues. Focus groups provide community members an opportunity to engage in productive learning and sharing sessions. Focus group discussions focused on community strengths, opportunities for improvement, existing resources, health needs, and possible solutions for improving the health of Gates County. A list of questions asked at the focus groups is available in Appendix B.

The purpose of the focus groups for Health ENC’s 2019 CHNA/CHA was to engage with a broad cross-section of individuals from each county, such as migrant worker groups, healthcare workers, or county employees, to name a few.

Conduent HCI consultants developed a Focus Group Guide and led training webinars for Health ENC members. Topics included facilitation techniques, moderator and note taker roles, as well as tips and
expectations for documenting focus group discussions. The list of focus group questions was reviewed and a transcript was provided for documentation purposes.

ARHS partnered with Sentara Albemarle Medical Center to collect primary data for the 2018 CHNA process for Gates County. Focus groups were led by trained moderators to learn more about the community’s definitions and understandings of health, illness, and services that affect health attitudes, beliefs, and behaviors. The CHNA Leaders Team collected data directly from county residents to better understand their health status, needs, and county resources. Data was collected from a wide variety of county residents to assure that the data represent all parts of the county population.

Seven focus group discussions were completed within Gates County between July 11, 2018 – July 26, 2018 with a total of 60 individuals. Participants included agricultural workers and senior citizens. Table 4 shows the date, location, population type, and number of participants for each focus group.

Focus group transcripts were coded and analyzed by common theme. The frequency with which a topic area was discussed in the context of needs and concerns or barriers and challenges to achieving health was used to assess the relative importance of the need in the community. Key themes that emerged from the focus group discussions are integrated into this report by topic area, with an emphasis on the most significant needs as evidenced by both primary and secondary data. A deeper analysis of focus group findings is available on HealthENC.org.

Results of the focus group dialogues further support the results from other forms of primary data collected (the community survey) and reinforces the findings from the secondary data scoring. By synthesizing the discussions that took place at the focus groups alongside the responses from the community survey, the primary data collection process for Gates County is rich with involvement by a representative cross section of the community.
**Data Considerations**

Several limitations of the data should be considered when reviewing the findings presented in this report. Although the topics by which data are organized cover a wide range of health and health-related areas, within each topic there is a varying scope and depth of data availability. In some topics there is a robust set of secondary data indicators, but in others there may be a limited number of indicators for which data is collected, or limited subpopulations covered by the indicators.

Data scores represent the relative community health need according to the secondary data that is available for each topic and should not be considered to be a comprehensive result on their own. In addition, these scores reflect what was found in the secondary data for the population as a whole, and do not factor in the health or socioeconomic need that is much greater for some subpopulations. In addition, many of the secondary data indicators included in the findings are collected by survey, and though methods are used to best represent the population at large, these measures are subject to instability—especially among smaller populations. The infant mortality rate indicator was corrected after the development of the content for this report. The values have been updated here and the impact was determined to be minimal to the analysis overall.

The disparities analysis, used to analyze the secondary data, is also limited by data availability. In some instances, data sources do not provide subpopulation data for some indicators, and for other indicators, values are only available for a select number of race/ethnic groups. Due to these limitations, it is not possible to draw conclusions about subpopulation disparities for all indicators.

The breadth of primary data findings is dependent on several factors. Focus group discussion findings were limited by which community members were invited to and able to attend focus group discussions, as well as language barriers during discussion for individuals whose native language is not English. Because the survey was a convenience sample survey, results are vulnerable to selection bias, making findings less generalizable for the population as whole.

**Prioritization**

A vital phase of the Community Health Needs Assessment (CHNA) involves reporting out to the communities being served and to those residents who participated in the data gathering process. Community health presentations were held to provide the opportunity for community residents and key stakeholders to learn about the health–related primary and secondary data from the 2018 CHNA process. The data was presented by ARHS, Sentara, and Vidant Hospitals through presentations geographically dispersed throughout the Albemarle Region.

The presentations were widely promoted through email invitations, newspaper announcements, the ARHS website, social media outlets, and by partnering organizations in an effort to bring the community together and strengthen an environment where the individuals were empowered in the decisions highlighted through the prioritization process.

Below is the list of presentations:

Monday, January 14, 2019:
Roanoke Chowan Community Health Clinic, Ahoskie, NC (Hertford County)

Wednesday, January 16, 2019:
Vidant Bertie Hospital, Windsor, NC (Bertie County)
Friday, January 18, 2019:
Shepard Pruden Library, Edenton, NC (Chowan County)
Monday, February 11, 2019:
Merchants Millpond State Park, Gatesville, NC (Gates County)
Friday, February 15, 2019:
Sentara Albemarle Medical Center (Camden, Currituck, Pasquotank, & Perquimans Counties)

In addition to Community Members, Community Agencies in Attendance Include:

- Alliance for Children and Families
- Behavioral Health
- Board of Education/School System
- City Government
- Community College/University
- Community Health Centers
- Cooperative Extension
- County Government
- County Commissioners
- Hospital Foundations
- Law Enforcement
- Local Health Departments
- Local Hospitals
- Local Treatment Centers
- NC Partnership for Public Health
- Rescue/Emergency Management Services
- Smart Start
- United Way

After reviewing the CHNA presentation for each county, discussion took place among the participants to determine community priority issues relating to the following criteria:

- **Magnitude of the Problem:** The size or extent of the problem as it relates to your county.
- **Consequences of the Problem:** How the economic, social, cultural, and political issues within your county might be influenced by addressing this issue.
- **Feasibility:** Are there enough resources in the county to address this issue and is the community ready to address this issue?
- **Duplication:** Is this issue already being addressed by other community stakeholders/programs?

After discussions, participants were then asked to use the priority list that was developed for each county to vote on their top three priority issues by placing a colored sticker next to their choices. After the post-presentation results were collected, the health issues were tallied. For Gates Partners for Health those were, in no particular order:

- Substance Misuse/Mental Health access and resources
- Access to health care providers
- Physical Activity and Nutrition/Chronic Disease Management and Prevention
Overview of Gates County

About Gates County
Gates County is a small, primarily rural county located in the Coastal Plain region of eastern NC. The county borders Hertford County to the west, Camden County to the northeast, Pasquotank County to the east and Perquimans County to the southeast. Gates also borders the state of Virginia to the north. Gates County is divided geopolitically into seven townships. The county seat is located in Gatesville. Gates County encompasses a land area of 346 square miles and the Great Dismal Swamp lies to the east. US 158 runs south to the Albemarle Sound and northwest to Elizabeth City. Highway 13 runs north and south through the county. Both join US Highway 64, which leads to the Outer Banks to the east and to Raleigh going west. The nearest major interstate is I-95, approximately 60 miles west of the county.

There are several commercial airports accessible to the county. The two closest are Norfolk International Airport in Norfolk, VA, 54 miles from the center of the county, and Newport News/Williamsburg International Airport in Newport News, VA, which is 66 miles from Gates County. The Richmond International Airport is approximately 97 miles from the county, and the Raleigh-Durham International Airport is about 160 miles away. The nearest Greyhound bus stop is in Edenton, NC, about 30 miles from Gatesville. Amtrak’s nearest stations are in Norfolk and Newport News, VA, both between 40 and 50 miles from Gatesville.

Gates County is part of the Albemarle Sound area of the Inner Banks. The county derives its name in honor of General Horatio Gates, a Revolutionary War hero. Prior to the settlement of this area by the Europeans, it was the home to the Nansemond, Chesapeake, Chowanoc/Chowanoke, Meherrin and Nottoway Indians. Pioneers in the early settlement years had to work to make a living off of land that was riddled with swamps and sandy soil that did not easily produce crops. The area grew from a thickly wooded and inhospitable land to an agrarian community between 1728 and 1780, giving it many of the same resources as surrounding areas. However, because of few navigable waterways, it was difficult for the county to grow into a prosperous urban center. In the 1900s, the county’s landscape was altered by technological changes. Bridges were built to connect Gates with its neighbors and railroads emerged as the new means of trade and transportation. This significantly aided in the export of the county’s timber and agriculture. As a consequence, the Great Dismal Swamp was turned into a recreational site.

Gates County offers pristine views of the Albemarle Sound to its south and contains a portion of the Great Dismal Swamp Canal. Both bodies of water are used primarily for recreational activity and leisure. Merchants Millpond State Park is also located in the county and is famous for its cypress trees and large swamp. There is much scenic beauty and nature to be enjoyed in the county. With the Chowan River, Beaver Lake, Merchant’s Millpond, and the Great Dismal Swamp, the county is a popular outdoor sports destination. There is plenty of game land and private property for hunting. There are three wildlife boat ramps in the region, making it excellent for fishing and boating.
Demographic Profile
The demographics of a community significantly impact its health profile. Population growth has an influence on the county’s current and future needs. Specific population subgroups, including veterans and different age, gender, race and ethnic groups, may have unique needs and require varied approaches to health improvement efforts. The following section explores the demographic profile of Gates County, North Carolina.

Population
According to the U.S. Census Bureau’s 2016 population estimates, Gates County has a population of 11,478 (Figure 6). While the population of Gates County has decreased from 2013 to 2015, there was a slight increase from 2015 to 2016.
Figure 7 shows the population density of Gates County compared to other counties in the Health ENC region. Gates County has a population density of 35.8 persons per square mile and is less dense than most other Health ENC counties.

Figure 7. Population Density of Health ENC Counties (U.S. Census Bureau, 2010)
Age and Gender

Overall, Gates County residents are older than residents of North Carolina and the Health ENC region. Figure 8 shows the Gates County population by age group. The 45-54 age group contains the highest percent of the population at 16.3%, while the 65-74 age group contains the next highest percent of the population at 11.3%.

Figure 8. Population by Age (U.S. Census Bureau, 2016)
People 65 years and older comprise 18.5% of the Gates County population, compared to 15.5% in North Carolina and 15.2% in the Health ENC counties (Figure 9).

Figure 9. Population 18+ and 65+ (U.S. Census Bureau, 2016)

Males comprise 49.1% of the population, whereas females comprise 50.9% of the population (Table 5). The median age for males is 45.2 years, whereas the median age for females is 45.8 years. Both are higher than the North Carolina median age (37.2 years for males and 40.1 years for females).

Birth Rate

Birth rates are an important measure of population health. The birth rate is usually the dominant factor in determining the rate of population growth; however, population growth is also driven by the age structure of the population (e.g., deaths), immigration and emigration. Figure 10 illustrates that the birth rate in Gates County (9.7 live births per 1,000 population in 2016) is lower than the birth rate in North Carolina (12.0) and Health ENC counties (13.1). While birth rates in the state and region have decreased slightly over the past four measurement periods, the birth rate in Gates County has increased over the same timeframe.

Figure 10. Birth Rate (North Carolina State Center for Health Statistics)
Race/Ethnicity

The race and ethnicity composition of a population is important in planning for future community needs, particularly for schools, businesses, community centers, health care and child care. Race and ethnicity data are also useful for identifying and understanding disparities in housing, employment, income and poverty.

Figure 11 shows the racial and ethnic distribution of Gates County compared to North Carolina and Health ENC counties. The first six categories (White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian & Other Pacific Islander and Multiracial) are racial groups and may include persons that identify as Hispanic or Latino. The seventh category (Hispanic or Latino) is an ethnic group and may include individuals that identify as any race.

The proportion of residents that identify as White in Gates County is 64.5%, compared to 71.0% in North Carolina and 63.8% in Health ENC counties. Gates County has a larger share of residents that identify as Black or African American (32.1%) when compared to North Carolina (22.2%) and Health ENC counties (30.7%). The Hispanic or Latino population comprises 2.0% of Gates County, which is a smaller proportion than the Hispanic or Latino population in North Carolina (9.2%) and Health ENC counties (9.6%).

Figure 11. Population by Race/Ethnicity (U.S. Census Bureau, 2016)
Tribal Distribution of Population
The U.S. Census Bureau collects population estimates for various American Indian and Alaska Native (AIAN) tribes. While population estimates of tribal data are not available at the county level, Table 6 shows the population estimates of eight tribal areas throughout the state of North Carolina.

Table 6. Named Tribes in North Carolina (American Community Survey, 2012-2016)

Military Population

Figure 12 shows the percent of the population 16 years of age and older in the military (armed forces). In 2012-2016, Gates County has a smaller share of residents in the military (0.5%) compared to North Carolina (1.0%) and counties in the Health ENC region (4.0%). Figure 12 also shows the trend analysis of the military population over the 4 most recent measurement periods. Across four time periods, the percent of the population in the military for Gates County has risen slightly, but is still lower than the military population in North Carolina and the Health ENC region.

Figure 12. Population in Military / Armed Forces (American Community Survey)
Veteran Population
The veteran population is given as a percent of the civilian population aged 18 years and older and this data is used for policy analyses, to develop programs, and to create budgets for veteran programs and facilities. Gates County has a veteran population of 9.3% in 2012-2016, compared to 9.0% for North Carolina and 12.4% for Health ENC counties (Figure 13).

Figure 13 also shows that the veteran population of Gates County, North Carolina, and the Health ENC region is decreasing slightly across four time periods from 2009-2013 to 2012-2016.

</table>
**Socioeconomic Profile**

Social and economic factors are well known to be strong determinants of health outcomes – those with a low socioeconomic status are more likely to suffer from chronic conditions such as diabetes, obesity and cancer. Community health improvement efforts must determine which subpopulations are most in need in order to effectively focus services and interventions.

**NC Department of Commerce Tier Designation**

The North Carolina Department of Commerce annually ranks the state’s 100 counties based on economic well-being and assigns each a Tier designation. The 40 most distressed counties are designated as Tier 1, the next 40 as Tier 2 and the 20 least distressed as Tier 3. Gates County has been assigned a Tier 1 designation for 2018.

**Income**

Median household income reflects the relative affluence and prosperity of an area. Areas with higher median household incomes are likely to have a greater share of educated residents and lower unemployment rates. Figure 14 shows the median household income in Gates County ($51,582), which is higher than the median household income in North Carolina ($48,256).

![Figure 14. Median Household Income (American Community Survey, 2012-2016)](image)
Gates County has a higher median household income than most counties in the Health ENC region (Figure 15).

Figure 15. Median Household Income of Health ENC Counties (American Community Survey, 2012-2016)
Within Gates County, zip code 27938 has the lowest median household income ($43,500) while zip code 27935 has the highest median household income ($61,694) (Figure 16).

Figure 16. Median Household Income by Zip Code (American Community Survey, 2012-2016)
**Poverty**

Federal poverty thresholds are set every year by the Census Bureau and vary by size of family and ages of family members. A high poverty rate is both a cause and a consequence of poor economic conditions. Children in poverty are more likely to have physical health problems, behavioral problems and emotional problems. Seniors who live in poverty are an especially vulnerable group due to increased physical limitations, medical needs, and social isolation. Persons with a disability are more likely to live in poverty compared to the rest of the population. Without adequate income, individuals with disabilities may not be able to afford necessary expenses, such as rent or mortgage, utility bills, medical and dental care, and food.

As seen in Figure 17, 12.0% percent of the population in Gates County lives below the poverty level, which is lower than the rate for North Carolina (16.8% of the population) and the Health ENC region (19.2%).

*Figure 17. People Living Below Poverty Level (American Community Survey, 2012-2016)*
As shown in Figure 18, the rate of children living below the poverty level is also lower for Gates County (22.0%) when compared to North Carolina (23.9%) and Health ENC counties (27.6%).

**Figure 18. Children Living Below Poverty Level (American Community Survey, 2012-2016)**

- Gates County: 22.0%
- North Carolina: 23.9%
- Health ENC Counties: 27.6%
Similarly, as shown in Figure 19, the rate of older adults living below the poverty level is lower in Gates County (6.3%) than in North Carolina (9.7%) and the Health ENC region (11.5%).

**Figure 19. People 65+ Living Below Poverty Level (American Community Survey, 2012-2016)**

![Bar chart showing percentage of population 65+ living below poverty level](chart)

As shown in Figure 20, the percent of disabled people living in poverty in Gates County (20.2%) is lower than the rate in North Carolina (29.0%) and Health ENC counties (28.1%).

**Figure 20. Persons with Disability Living in Poverty (American Community Survey, 2012-2016)**

![Bar chart showing percentage of disabled population 20-64 living in poverty](chart)
Housing
The average household size in Gates County is 2.6 people per household, which is similar to the North Carolina value of 2.5 people per household.

High costs of homeownership with a mortgage can strain both homeowners and the local housing market. Figure 21 shows mortgaged owners median monthly household costs in the Health ENC region. In Gates County, the median housing costs for homeowners with a mortgage is $1,273, which is slightly higher than the North Carolina value of $1,243, and higher than the majority of counties in the Health ENC region.

Figure 21. Mortgaged Owners Median Monthly Household Costs, Health ENC Counties (American Community Survey 2012-2016)
Safe and affordable housing is an essential component of healthy communities, and the effects of housing problems are widespread. Figure 22 shows the percent of households with at least one of the following problems: overcrowding, high housing costs, lack of kitchen, or lack of plumbing facilities. Countywide, 13.4% of households in Gates County have severe housing problems, compared to 16.6% in North Carolina and 17.7% in Health ENC counties.
Food Insecurity
The Supplemental Nutrition Assistance Program (SNAP) is a federal assistance program that provides low-income families with electronic benefit transfers (EBTs) that can be used to purchase food. The goal of the program is to increase food security and reduce hunger by increasing access to nutritious food.

Figure 23 shows the percent of households with children that participate in SNAP. The rate for Gates County, 48.6%, is lower than the state value of 52.6% and the Health ENC region value of 51.5%.

Figure 23. Households with Children Receiving SNAP (American Community Survey, 2012-2016)

Access to Grocery Stores and Farmers’ Markets

- In 2014, there were three grocery stores listed in Gates County. [https://www.ers.usda.gov/FoodAtlas/](https://www.ers.usda.gov/FoodAtlas/)
- From 2010 to 2015, Gates County households with no car and therefore low access to grocery stores decreased from 3.9% to 3.2%.
- Despite the rural, agrarian nature of much of the ARHS region, there are very few farmers’ markets anywhere in the region. In 2016, The US Department of Agricultural listed the following counties in the ARHS region with having markets:
  Chowan County: 1
  Currituck County: 11
  Hertford County: 1
  Pasquotank County: 1
SocioNeeds Index
Conduent Healthy Communities Institute developed the SocioNeeds Index® to easily compare multiple socioeconomic factors across geographies. This index incorporates estimates for six different social and economic determinants of health – income, poverty, unemployment, occupation, educational attainment, and linguistic barriers – that are associated with poor health outcomes including preventable hospitalizations and premature death.

Zip codes within Gates County are assigned an index value from 0 (low need) to 100 (high need), based on how those zip codes compare to others in the U.S. Within Gates County, the zip codes are then ranked from 1 (low need) to 5 (high need) to identify the relative level of need. Zip codes with populations under 300 persons are excluded. Zip code 27946, with an index value of 83.8, has the highest level of socioeconomic need within Gates County. This is illustrated in Figure 24. Index values and the relative ranking of each zip code within Gates County are provided in Table 7.

Figure 24. SocioNeeds Index® (Conduent Healthy Communities Institute, 2018)
Understanding where there are communities with high socioeconomic need is critical to forming prevention and outreach activities.

Educational Profile

Educational Attainment
Graduating from high school is an important personal achievement and is essential for an individual’s social and economic advancement. Graduation rates can also be an important indicator of the performance of an educational system. Having a bachelor’s degree opens up career opportunities in a variety of fields and is often a prerequisite for higher-paying jobs.

Countywide, the percent of residents 25 or older with a high school degree or higher (85.3%) is similar to the state value (86.3%) and the Health ENC region (84.7%) (Figure 25). Higher educational attainment in Gates County is lower than the state and regional value. While 29.0% of residents 25 and older have a bachelor’s degree or higher in North Carolina, the rate drops to 19.9% in Health ENC counties and 14.5% in Gates County (Figure 25).

Figure 25. People 25+ with a High School Degree or Higher and Bachelor’s Degree or Higher (American Community Survey, 2012-2016)
Countywide, the high school degree attainment rate varies, with zip code 27979 having the lowest high school graduation rate of 80.6% (Figure 26).

Figure 26. People 25+ with a High School Degree or Higher by Zip Code (American Community Survey, 2012-2016)
High School Dropouts

High school dropouts earn less income than high school and college graduates, and are more likely to be unemployed. High school dropouts are generally less healthy and require more medical care. Further, high school dropout rates are linked with heightened criminal activity and incarceration rates, influencing a community’s economic, social, and civic health.

Gates County’s high school dropout rate, given as a percent of high school students in Figure 27, was 1.0% in 2016-2017, which is lower than the rate in North Carolina (2.3%) and the Health ENC region (2.4%). Further, the dropout rate in Gates County has decreased noticeably from 2013-2014 to 2016-2017.

Figure 27. High School Dropout Rate (North Carolina Department of Public Instruction)
High School Suspension Rate

High school suspension is a form of discipline in which a student is temporarily removed from a classroom and/or school due to a violation of school conduct or code. Higher rates of suspension can be related to high rates of antisocial or delinquent behaviors, which may further contribute to potential future involvement in the juvenile justice system. Additionally, schools with higher suspension rates have higher rates of law or board of education violations and generally spend more money per student.

Gates County’s rate of high school suspension (24.2 suspensions per 100 students) is higher than North Carolina’s rate (18.2) and slightly lower than the rate of Health ENC counties (25.5) in 2016-2017. As shown in Figure 28, the suspension rate in Gates County has increased since 2013-2014.

Figure 28. High School Suspension Rate (North Carolina Department of Public Instruction)
Environmental Profile

AIR QUALITY
The US Environmental Protection Agency (EPA) maintains air quality monitoring stations throughout the country to continuously measure the air pollutants that most affect the health and wellbeing of the public: carbon monoxide, nitrous oxide, sulfates, ozone and particulate matter. These stations tend to be located in populous areas or along highway routes that carry significant traffic loads, but none are located in or near Gates County, so there is no Air Quality Index (AQI) data for this locale.

http://www.epa.gov/airdata/ad_rep_aqi.html

DRINKING WATER
The EPA’s Safe Drinking Water Information System (SDWIS) contains information about public water systems and their violations of EPA’s drinking water regulations, as reported to EPA by the states. The EPA establishes maximum contaminant levels, treatment techniques, and monitoring and reporting requirements to ensure that water systems provide safe water to their customers.

As of October 10, 2018, SDWIS listed one active water systems in Gates County, all of which were Community Water Systems that served an estimated 11,621 people or 100% of the population. A community water system is one with at least 15 service connections used by year-round residents or one that regularly serves 25 year-round residents. This category includes municipalities, subdivisions, and mobile home parks. Among this one CWS, there was no health violations in the past 10 years.

https://www3.epa.gov/enviro/facts/sdwis/search.html

SOLID WASTE
Albemarle Regional Solid Waste Management Authority is a county-level legal entity serving the Counties of Perquimans, Chowan, Gates, Dare, Currituck, Hyde, and Tyrrell. This area currently has approximately 107,000 permanent residents and several hundred thousand visitors each year. Through a 26-year contract signed in 2009 with Republic Services of NC, LLC, the Authority aims to provide cost-effective and efficient solid waste disposal for the region.

All municipal wastes and most of the construction and demolition debris from the Authority’s members are landfilled in the East Carolina Environmental Landfill in Bertie County (owned by Republic Services of NC). The waste is primarily sent there through the three transfer stations located in Dare County, Currituck County, and Perquimans County. The towns and counties operate their own solid waste and recycling collection programs.

RABIES
According to the Epidemiology Section of NC DPH, there were three confirmed cases of rabies in animals in Gates County between 2008 and 2018. Rabies is not common in the ARHS region, with only 43 cases identified region-wide over the ten year period presented.

http://epi.publichealth.nc.gov/cd/rabies/figures.html#tables
Transportation Profile
Public transportation offers mobility, particularly to people without cars. Transit can help bridge the spatial divide between people and jobs, services, and training opportunities. Public transportation also reduces fuel consumption, minimizes air pollution, and relieves traffic congestion. Walking to work helps protect the environment, while also providing the benefit of daily exercise.

Countywide, 0.8% of residents walk to work, compared to the state value of 1.8% and the regional value of 2.4%. Public transportation is rare in Gates County, with an estimated 0.0% of residents commuting by public transportation, compared to the state value of 1.1% and the regional value of 0.4% (Figure 29). In Gates County, 84.6% of workers 16 and older drive alone to work, compared to 81.1% in North Carolina and 81.4% in Health ENC counties (Figure 30).

Crime and Safety

Violent Crime and Property Crime
Both violent crime and property crime are used as indicators of a community’s crime and safety. Violence negatively impacts communities by reducing productivity, decreasing property values and disrupting social services. Violent crime includes four offenses: murder and non-negligent manslaughter, rape, robbery, and aggravated assault. Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson.

Figure 31 shows the violent crime rate in North Carolina. The rate has increased from 333.0 violent crimes per 100,000 population in 2014 to 374.9 violent crimes per 100,000 population in 2016. Values for Gates County were not available over the same measurement period.

Figure 31. Violent Crime Rate (North Carolina Department of Justice)
The property crime rate in Gates County (0.0 per 100,000 people in 2016) is lower than the state value (2,779.7 per 100,000 people) (Figure 32). Over the past four measurement periods, the property crime rate in Gates County has consistently remained at 0.0 per 100,000 population.

Figure 32. Property Crime Rate (North Carolina Department of Justice)
Juvenile Crime
Youth who commit a crime may not gain the educational credentials necessary to secure employment and succeed later in life. Negative peer influences, history of abuse/neglect, mental health issues, and significant family problems increase the risk of juvenile arrest. The juvenile justice system aims to reduce juvenile delinquency through prevention, intervention, and treatment services.

Figure 33 shows the juvenile undisciplined rate per 1,000 youth ages 6-17 years old. The undisciplined rate describes juveniles who are unlawfully absent from school, regularly disobedient and beyond disciplinary control of the parent/guardian, are regularly found where it is unlawful for juveniles to be, or have run away from home for more than 24 hours. The 2017 juvenile undisciplined rate in Gates County (2.4) is higher than the rate in North Carolina (1.5) and the Health ENC region (1.1).
Figure 34 shows the juvenile delinquent rate, or juvenile crime rate, per 1,000 youth ages 6-15 years old. The 2017 juvenile delinquent rate in Gates County (11.8) is lower than the rate in North Carolina (19.6) and the Health ENC region (22.8). While the juvenile crime rate in Gates County decreased from 2014 to 2016, the rate increased from 6.4 in 2016 to 11.8 in 2017.

**Figure 34. Juvenile Delinquent Rate (North Carolina Department of Public Safety)**

![Graph showing delinquent rate per 1,000 population for youths aged 6-15 for Gates County, North Carolina, and Health ENC Counties from 2014 to 2017.](image)
**Child Abuse**

Child abuse includes physical, sexual and emotional abuse. All types of child abuse and neglect can have long-lasting effects throughout life, damaging a child’s sense of self, ability to have healthy relationships, and ability to function at home, at work, and at school. Figure 35 shows the child abuse rate per 1,000 population aged 0-18. The 2017 child abuse rate in Gates County (0.00 per 1,000 population) is lower than the rate in North Carolina (0.22) and the Health ENC region (0.28).

![Figure 35. Child Abuse Rate](image-url)

Incarceration

According to the U.S. Bureau of Justice Statistics, approximately one out of 100 adults in the U.S. are in jail or prison. Conditions in jails and prisons can lead to an increased risk of infectious diseases such as tuberculosis and hepatitis C, as well as assault from other inmates. After incarceration, individuals are likely to face a variety of social issues such as employment discrimination, disruption of family relationships and recidivism.

Figure 36 shows the incarceration rate per 1,000 population. The 2017 incarceration rate in Gates County (103.1 per 1,000 population) is lower than the rate in North Carolina (276.7) and the Health ENC region (232.6). Further, the incarceration rate in Gates County decreased from 2016 to 2017.

![Figure 36. Incarceration Rate (North Carolina Department of Public Safety)](image-url)
Access to Healthcare, Insurance and Health Resources Information

Health Insurance
Medical costs in the United States are very high. People without health insurance may not be able to afford medical treatment or prescription drugs. They are also less likely to get routine checkups and screenings, so if they do become ill they may not seek treatment until the condition is more advanced, and therefore more difficult and costly to treat.

Figure 37 shows the percent of people aged 0-64 years old that have any type of health insurance coverage. The rate for Gates County, 88.7%, is similar to the rate for North Carolina (87.8%) and the Health ENC region (87.2%).

Figure 37. Persons with Health Insurance (Small Area Health Insurance Estimates, 2016)
Figure 38 shows the percent of the population only receiving health insurance through Medicaid, Medicare, or military healthcare (TRICARE). Gates County has a smaller percent of people receiving Medicaid (17.8%) than North Carolina (18.2%) and Health ENC counties (21.7%). The percent of people receiving Medicare is higher in Gates County (6.4%) when compared to North Carolina (4.8%) and Health ENC counties (4.5%). The percent of people receiving military health insurance is lower in Gates County (1.7%) than in North Carolina (2.1%) and Health ENC counties (6.6%).

Figure 38. Persons Only Receiving Health Insurance through Medicaid, Medicare or Military Healthcare (American Community Survey, 2012-2016)

People without health insurance are often the segment of the population least likely to seek and/or to be able to access necessary health care. Countywide, 11.3% of residents are uninsured.
Civic Activity

Political Activity
Exercising the right to vote allows a community to choose elected officials and hold them accountable. Voting ensures that all citizens have the opportunity to voice their opinions on issues such as the use of tax dollars, civil rights and foreign policy. By voting, individuals shape their communities and influence the next generation of society. A high level of voter turnout indicates that citizens are involved and interested in who represents them in the political system.

Figure 39 shows the voting age population, or percent of the population aged 18 years and older. Gates County has a higher percent of residents of voting age (79.1%) than North Carolina (77.3%) and Health ENC counties (76.7%).
Figure 40 shows the percent of registered voters who voted in the last presidential election. The rate in Gates County was 62.3%, which is lower than the state value (67.7%) and Health ENC region (64.3%).

Figure 40. Voter Turnout in the Last Presidential Election  
(North Carolina State Board of Elections, 2016)
Findings

Secondary Data Scoring Results
Table 8 shows the data scoring results for Gates County by topic area. Topics with higher scores indicate greater need. Transportation is the poorest performing health topic for Gates County, followed by Diabetes, Access to Health Services, Maternal, Fetal & Infant Health and Exercise, Nutrition & Weight.

Primary Data

Community Survey
Figure 41 shows the list of community issues that were ranked by residents as most affecting the quality of life in Gates County. Low income/poverty was the most frequently selected issue and was ranked by 45.1% of survey respondents, followed by drugs/substance abuse. Less than 1% of survey respondents selected theft, homelessness, hopelessness, elder abuse, child abuse, domestic violence, violent crime, and rape/sexual assault as issues most affecting the quality of life in Gates County.
Figure 42 displays the level of agreement among Gates County residents in response to nine statements about their community. More than half of survey respondents agreed or strongly agreed that the county is a safe place to live, is a good place to grow old and is a good place to raise children. More than half of survey respondents disagreed or strongly disagreed that the county is easy to buy healthy foods in, has good economic opportunities, and has good healthcare.

**Figure 43. Services Needing the Most Improvement, as Ranked by Survey Respondents**
Figure 44 shows a list of health behaviors that were ranked by residents as topics that Gates County residents need more information about. Substance abuse prevention was the most frequently selected issue, being ranked by 27.6% of survey respondents.

Figure 44. Health Behaviors that Residents Need More Information About, As Ranked by Survey Respondents

Focus Group Discussions

Table 9 shows the focus group results for Gates County by topic area or code. Focus Group transcript text were analyzed by the Conduent HCI team using a list of codes that closely mirror the health and quality of life topics used in the data scoring and community survey processes. Text was grouped by coded excerpts, or quotes, and quantified to identify areas of the highest need per the focus group participants. All excerpts/quotes were also categorized as a strength or a barrier/need based on the context in which the participant mentioned the topic. Topics with higher frequency and mentioned in the context of needs/concerns or barriers/challenges suggests greater need in the community. All topics listed below are included in the overall list of significant health needs.

Data Synthesis

All forms of data have strengths and limitations. In order to gain a comprehensive understanding of the significant health needs for Gates County, findings from the secondary data, community survey and focus group discussions were compared and analyzed for areas of overlap. The top needs from each data source were identified using the criteria displayed in Table 10.

Table 10. Criteria for Identifying the Top Needs from each Data Source

<table>

</tr>
</tbody>
</table>

*Community Survey Q4: Please look at this list of community issues. In your opinion, which one issue most affects the quality of life in this County?

The top needs from each data source were incorporated into a Venn Diagram. Community issues ranked by survey respondents were categorized to align with the health and quality of life topic areas displayed in Table 2.

Figure 45 displays the top needs from each data source in the Venn diagram.

Figure 45. Data Synthesis
Across all data sources, there is overlap and indication of need for Access to Health Services, Transportation and Exercise, Nutrition & Weight. As seen in Figure 45, the survey results and focus group discussion analysis cultivated additional topics not ranked as top priorities in the secondary data findings. A mixed-methods approach is a strength when assessing a community as a whole. This process ensures robust findings through statistical analysis of health indicators and examination of constituent’s perceptions of community health issues.

**Topic Areas Examined in This Report**

Nine topic areas were identified across the three data sources. These topics are listed in Table 11.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

The five topic areas with the highest secondary data scores (starred*) are explored in-depth in the next section and include corresponding data from community participants when available. Following the five topic areas is a section called ‘Other Significant Health Needs’ which includes discussion of the additional topics that were identified specifically in the community survey and focus group discussions. The additional topics in ‘Other Significant Health Needs’ includes Economy, Environment, Occupational & Environmental Health and Substance Abuse.

**Navigation Within Each Topic**

Findings are organized by topic area. Within each topic, key issues are summarized followed by a review of secondary and primary data findings. Special emphasis is placed on populations that are highly impacted, such as older adults, race/ethnic groups or low-income populations. Figures, tables and extracts from quantitative and qualitative data substantiate findings. Each topic includes a table with key indicators from the secondary data scoring results. The value for Gates County is displayed alongside relevant comparisons, gauges and icons which are color-coded with green indicating good, red indicating bad and blue indicating neutral. Table 12 describes the gauges and icons used to evaluate the secondary data.

Transportation

Key Issues
- Workers in Gates County do not commute by public transportation
- There are many solo drivers with long commutes
- Very few workers walk to work

Secondary Data
With a topic score of 1.99, Transportation is the greatest area of concern for Gates County based on the secondary data scoring results. Table 13 list high-scoring indicators for this topic. In 2012-2016 it was estimated that no workers commuted by public transportation and the mean travel time to work (36.7 minutes) was higher than the state and U.S. values. In addition, more than 58% of solo drivers had a long commute to work.

![Table 13. Data Scoring Results Transportation](image)

Primary Data
According to survey results, transportation did not rank as one of the top services individuals in Gates County felt needed the most improvement compared to other issues in the community. 0% of
participants selected transportation options needing improvement in their neighborhood. Transportation was brought up multiple times in the focus group discussions, participants sharing that they found accessing transportation difficult in particular for completing necessary errands, such as grocery shopping, and also many participants described having difficulties traveling to medical appointments.

**Highly Impacted Populations**
Focus group participants specifically raised concerns for elderly community members being able to get to medical facilities and grocery stores.
Diabetes

Key Issues
- Diabetes is a major issue for adults 20+ and the Medicare Population
- The age-adjusted death rate due to diabetes is high

Secondary Data
Diabetes received a topic score of 1.93 based on the secondary data scoring results. Table 14 lists indicators of concern, including high percentages of diabetes within the Medicare Population and among adults. The age-adjusted death rate due to diabetes is higher in Gates County compared to North Carolina and the U.S., but showing some signs of decrease.

*See Appendix A for full list of indicators included in each topic area

Primary Data
Community survey respondents rated eating well/nutrition, exercising/fitness, going to the doctor for yearly checkups and screenings and managing weight as topics the community needs more information about which may also impact the adult population living with Diabetes. 13.6% of community survey participants reported being told by a medical professional that they have diabetes and 48.6% had been told that they were overweight or obese.
Diabetes was discussed thirteen times during the focus group discussions as an issue the community was facing though the topic was not discussed in depth. Across all focus group discussions, participants conversed about barriers in the community to eating healthy and exercising. Most participants discussed financial limitations to eating healthier and lack of healthy food options in the community. One participant shared their challenges with acquiring needed medication to manage their diabetes and the high cost associated. Multiple participants suggested that the community needs support groups focused on chronic health conditions, including Diabetes.

“It costs $900 for 4 shots for diabetes. My insurance company denied the cost. I paid out of pocket for the shots, but I went 14 days without a shot. We have 1 pharmacy in the county. I had to appeal to the insurance company to get on {product}. I had a free coupon, but had to drive to Suffolk to get it.”

– Focus Group Participant

Highly Impacted Populations
Primary data did not identify any specific highly impacted populations.
Access to Health Services

Key Issues
- There is a high proportion of preventable hospital stays within the Medicare Population
- Provider rates are low for dentists and mental health, primary care and non-physician primary care providers

Secondary Data
Equal to Diabetes, the topic of Access to Health Services received a score of 1.93. Table 15 shows high-scoring related indicators based on the secondary data scoring results. The findings reveal a lack of providers in the county.

Primary Data
As previously summarized, the majority of community survey respondents have health insurance through an employer (54.4%) followed by Medicare (19.8%). Participants were asked where they most often go to seek medical treatment, the majority sought care at a doctor’s office 73.1% and 17% sought care at an urgent care center. The majority of participants did not report any problems getting the health care they needed in the past 12 months (87.7%). For those who reported having difficulties accessing health care services, the most common reported providers that they had trouble getting services from were a dentist (31%), general practitioner (27.6%), specialist (20.7%), other (20.7%) or pharmacy/prescriptions (17.2%). The top reasons participants reported not being able to get the necessary health care they needed were insurance did not cover services (27.6%), couldn’t get an appointment (24.1%) or the wait was too long (24.1%). 7.6% of participants reported being able to see the medical provider they needed within Gates County while the majority sought care in other places such as the state of Virginia (43.7%), Hertford County (19.3%) and Pasquotank County (17.2%).

Focus Group participants frequently discussed barriers to accessing health services such as scheduling appointments with health care providers, challenges with providers accepting their health insurance plan and lack of transportation to medical centers. Farm workers specifically raised the issue that their work hours prevent them from seeking health services and the distance to the services is prohibitive. Participants described challenges with scheduling appointments within their community and having to travel outside of Gates County to see the health care provider that they needed. Several participants thought that the community would benefit from having a full service community health center, a free clinic for low income or uninsured individuals or a clinic that is open outside of regular work hours.

Highly Impacted Populations
Focus Group Participants brought up veterans, homebound elderly, and farm workers as groups they perceived are not able to access health services.
Exercise, Nutrition & Weight

Key Issues
- There is high percent of adults who are sedentary
- There are very few access to exercise opportunities in Gates County
- Less than 1% of workers walk to work

Secondary Data
Exercise, Nutrition and Weight received a topic score of 1.55. Table 16 lists high-scoring indicators and reveals that there is an opportunity to increase access to exercise opportunities. Although the percentage of adults who are sedentary was lower in 2014 than the Healthy People 2020 target, there are signs of an upward trend.

*See Appendix A for full list of indicators included in each topic area*

Primary Data
Among community survey respondents, 46.5% rated their health is good and 33.9% rated their health as very good. However, 48.6% of respondents reported being told by a health professional that they were overweight and/or obese. This was closely followed by high reports of high blood pressure (44.6%), high cholesterol (33.9%) and diabetes (13.6%). Data from the community survey participants show that 40.9% of community members do not engage in any physical activity or exercise during the week that lasts at least 30 minutes. Among individuals that do not exercise, respondents reported reasons of not having enough time (36.5%) being too tired (31.8%), and I don't like to exercise (30.8%). For those
individuals that do exercise, 81.3% reported exercising or engaging in physical activity at home while 11.8% do so at a public park followed by a public recreation center (11.1%) or work site/employer (11.1%).

Exercise, Nutrition & Weight was discussed in all focus groups. Participants shared that they struggled with not being able to afford to eat healthy or knowing what to select as healthy food choices when eating away from home. Specific issues included difficulty finding fresh vegetables due to limited choices for grocery stores and family traditions around cooking. A few participants felt that nutritional education is needed in the community. To emphasize this point, when community members were asked about specific topic areas they were interested in learning more about in the community survey, managing weight, nutrition, and exercising/fitness were high frequency responses. Participants also suggested taking advantage of community assets such as walking trails and initiating no-cost fitness groups.

“I believe there is also a major lack of nutritional education. Born and raise a certain way, eating certain foods and I just feel that sometimes when family members start to have the same health issues, it’s just like well my parents or previous generations had it so I’m bound to get it.”

-Focus Group Participant

Highly Impacted Populations
Focus group participants raised homebound elderly and low income families as being highly effected by barriers.
Maternal, Fetal & Infant Health

Key Issues
- The county has a high percentage of babies with low birth weight and preterm births compared to the state, U.S. and Healthy People 2020 values

Secondary Data
With the same topic score as Exercise, Nutrition and Weight (1.55), Maternal, Fetal & Infant Health is another top need in Gates County. Table 17 shows indicators of concern, particularly the percent of babies with low birth weight and percent of preterm births.

Table 17. Data Scoring Results Maternal, Fetal & Infant Health

*See Appendix A for full list of indicators included in each topic area*

Primary Data
In the community survey, participants were asked to identify health behaviors people in the community need more information about and “getting prenatal care during pregnancy” was selected less than 1% of the survey respondents. This result may have been due to the demographics of survey respondents and not necessarily reflect the ultimate need in the community. During the focus group discussions, teen pregnancy and pre/post-natal care was not raised as an issue in the community. The lack of discussion in relation to Maternal, Fetal and Infant Health may also indicate a lack of awareness in the community about these issues.

Related to teen health and pregnancy, “positive teen activities” was the fifth highest ranking service needing improvement in the community (5.9%) and preventing pregnancy/sexually transmitted diseases was selected as the tenth highest ranking health behavior than people in the community need more information about.
Highly Impacted Populations
No specific groups were identified in the primary data sources.
Mortality

Knowledge about the leading causes of death in a population is critical to understanding how to target interventions to maximize population health. Table 18 shows the leading causes of mortality in Gates County, North Carolina, and Health ENC Counties in 2014-2016, where the rate is age-adjusted to the 2000 U.S. standard population and is given as an age-adjusted death rate per 100,000 population.

Other Significant Health Needs

Economy

Secondary Data
From the secondary data scoring results, the Economy topic had a score of 1.31 and was the 21st highest scoring health and quality of life topic. High scoring related indicators include: Households with Supplemental Security Income (2.70), Households with Cash Public Assistance Income (2.50), Total Employment Change (2.40) and Median Housing Unit Value (2.18).

A list of all secondary indicators within this topic area is available in Appendix A.

Primary Data
Community survey participants were asked to rank the issues most negatively impacting their community’s quality of life. According to the data, both poverty and the economy were the top issues in Gates County that negatively impact quality of life. Community survey participants were also asked to weigh-in on areas of community services that needed the most improvement. With the highest share of responses, availability of employment (28.1%) and higher paying employment (9.9%). When asked to expand on services that could be improved the need for more economic activity in the community and jobs offering higher salaries.

Focus group participants also touched on key economic stressors: challenges with being able to afford healthy behaviors or activities and delays in seeking health care due to costs. Multiple participants raised lack of employment opportunities and economic development in the community as reasons for people leaving or not choosing to move into the county.

Environment

Secondary Data
From the secondary data scoring results, the Environment topic had a score of 1.33 and was the 18th highest scoring health and quality of life topic. High scoring related indicators include: Access to Exercise Opportunities (2.40), Houses Built Prior to 1950 (1.90) and SNAP Certified Stores (1.90).

A list of all secondary indicators within this topic area is available in Appendix A.

Primary Data
Among community survey respondents, better or more healthy food choices was the third ranked service needing improvement in the community, while positive teen activities was fifth, more affordable/better housing was eighth and better/ more recreational facilities was ninth. Focus group participants also raised the need for more grocery stores and recreational facilities. Over 70% of survey participants disagreed or strongly disagreed that it is easy to buy healthy foods in the community and 36% of survey participants disagreed or strongly disagreed that there are good parks and recreation facilities. 7.7% of survey participants felt that lack of community support was a top issue.

“{We} need employment opportunity in the county and some type of business to attract people to work and come into the county to work but our young people are going out of the county.”
-Focus Group Participant
affecting the quality of life in the community and almost 36% disagreed or strongly disagreed that there is help for people during times of need in the county.

**Occupational & Environmental Health**

**Secondary Data**

From the secondary data scoring results, the Occupational & Environmental Health topic had a score of 1.33 and was the 19th highest scoring health and quality of life topic. High scoring related indicators include: Asthma: Medicare Population (1.75).

A list of all secondary indicators within this topic area is available in Appendix A.

**Primary Data**

Pollution was the seventh highest ranking issue affecting quality of life in the community, with less than 2% of participants selecting this topic. This topic was brought up in the Focus Group discussions as a top concern. Participants expressed extreme concerns with the exposure to chemicals from local industry. In particular, health effects from exposure to chemicals from spraying on crops was a primary concern within the community especially for those working on the farm. Participants also had concerns about standing water and mosquitoes.

“A lot of people’s allergies do flare up during those times that they’re spraying or harvesting”  
-Focus Group Participant

**Substance Abuse**

**Secondary Data**

From the secondary data scoring results, the Substance Abuse topic had a score of 1.44 and was the 12th highest scoring health and quality of life topic. High scoring related indicators include: Alcohol-Impaired Driving Deaths (1.65).

A list of all secondary indicators within this topic area is available in Appendix A.

**Primary Data**

Community survey participants ranked substance abuse (24.4%) as a top issue affecting quality of life in Gates County. Additionally, 27.6% of community survey respondents reported wanting to learn more about substance abuse prevention.

10.7% of survey participants reported currently use tobacco products. Of those who reported tobacco product use, 25.9% would go to a doctor if they wanted to quit and 25.9% stated that they did not want to quit. 43.1% of survey participants reported having been exposed to secondhand smoke in the last year. Of those who indicated that they had been exposed to secondhand smoke, 33.3% were exposed in the home and 33.3% selected ‘other’, mostly adding that they had been exposed in other people’s homes. Most participants (77%) reported that in the past 30 days, there were zero times where they drank more than 4/5 drinks on a single occasion and 9.1% had one time. Reported illicit drug use amongst survey participants in the past 30-days was low, 99.2% reported no illegal drug use and 98.4% reported no use of prescription drugs they did not have a prescription for. Of those who reported any illegal drug use (<1%) in the past 30 days, 100% reported marijuana use.
Focus group discussion did not focus heavily on substance abuse, however, one participant specifically raised prescription drugs as an issue they see as a problem that needs to be addressed in the community. Two participants mentioned that there is a lack of substance abuse treatment and behavioral health services in the community.
A Closer Look at Highly Impacted Populations

Several subpopulations emerged from the primary and secondary data for their disparities in access to care, risk factors, and health outcomes. This section focuses on these subpopulations and their unique needs.

Disparities by Age, Gender and Race/Ethnicity

Secondary data are further assessed to determine health disparities for race/ethnic, age, or gender groups. Table 19 identifies indicators in which a specific population subgroup differs significantly and negatively from the overall population in Gates County, with significance determined by non-overlapping confidence intervals. The list of indicators with significant disparities should be interpreted with caution. Indicators beyond those displayed in Table 19 may also negatively impact a specific subgroup; however, not all data sources provide subpopulation data, so it is not possible to draw conclusions about every indicator used in the secondary data analysis.

Geographic Disparities

Geographic disparities are identified using the SocioNeeds Index®. Zip code 27946, with an index value of 83.8, has the highest socioeconomic need within Gates County, potentially indicating [poorer/better/average] health outcomes for its residents. See the SocioNeeds Index® for more details, including a map of Gates County zip codes and index values.
Conclusion
The Community Health Needs Assessment utilized a comprehensive set of secondary data indicators measuring the health and quality of life needs for Gates County. The assessment was further informed with input from Gates County residents through a community survey and focus group discussions that included participants from broad interests of the community. The data synthesis process identified nine significant health needs: Access to Health Services, Diabetes, Economy, Environment, Exercise, Nutrition & Weight, Maternal, Fetal & Infant Health, Occupational & Environmental Health, Substance Abuse and Transportation. The prioritization process identified three focus areas: (1) Access to Healthcare Providers (2) Physical Activity and Nutrition/Chronic Disease Prevention and (3) Substance Misuse/Mental Health.

Priority 1: Access to Healthcare Providers
Health Indicators: There is no hospital located in Gates County so residents in need of hospital-level care must travel out of county, or out of state, for treatment. Participants in the small group discussions identified the limited availability of healthcare services as a barrier to good health in Gates County. With the small number of providers making scheduling difficult, respondents cited increasing wait times and long distances to travel. Respondents reported struggling with the high cost of insurance, medications and doctor visits.
Population At Risk: Those with limited transportation options.
Health resources available/needed:
**Available Resources:**
Albemarle Regional Health Services
Gates County Health Department Clinical Services
Gateway Community Health Center, Inc. of Gatesville

**Resources Still Needed:**
Free-standing Urgent Care Center
More local health care providers

Priority 2: Physical Activity and Nutrition/Chronic Disease Prevention
Health Indicators: Obesity, Heart Disease, Cancer, Diabetes, Smoking
Heart disease, diabetes, and cancer are all long-term, or chronic, conditions that limit quality of life, require medical management and treatment, and are among the leading causes of death in Gates County. Committing to a healthy, active lifestyle is one of the most important ways to prevent chronic diseases.
Population At Risk: The Poor, Males
Health resources available/needed:
**Available Resources:**
Gates County Community Center (Recreation Center)
Merchants Millpond State Park
NC Cooperative Extension – Gates County
Gateway Community Health Center, Inc.
Gates County Diabetes Program (Supported by a grant from Obici Healthcare Foundation)
Albemarle Regional Health Services
Gates County Health Department
School Health
Partnerships to Improve Community Health (PICH) Grant
Farmers Markets (2)
Gates County Farmers Market
Dalure Farms

**Resources Still Needed:**
Urgent Care Center
Obesity programs for children/youth
Tobacco cessation programs among youth
Stable/viable farmers market(s)
Senior Center

**Priority 3: Substance Misuse/Mental Health**
Health Indicators: While some data is available pertaining to utilization of services pertaining to mental health, substance misuse, and developmental disabilities, there is not much data describing the prevalence of individual diagnoses.
Population At Risk: The Poor, Uninsured, Elderly

Health resources available/needed:

**Available Resources:**
Trillium Health Resources
Community Care Plan of Eastern North Carolina
Gates County Public Library
RI International
North Eastern Counseling Services
Family Resource Center

**Resources Still Needed:**
More local mental health resources

Following this process, Gates County will outline how it plans to address these health needs in its implementation plan.

We hope to incorporate any feedback on this report into the next CHNA process. Please send your feedback and comments to [www.arhs-nc.org](http://www.arhs-nc.org).
Appendix A. Secondary Data Scoring

Overview

Data scoring consists of three stages, which are summarized in Figure 46:

Comparison Score
For each indicator, Gates County is assigned up to 7 comparison scores based on its comparison to other communities, whether health targets have been met, and the trend of the indicator value over time. Comparison scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47).

Indicator Score
Indicator scores are calculated as a weighted average of comparison scores. Indicator scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47).

Topic Score
Indicators are then categorized into topic areas. Topic scores are calculated by averaging all relevant indicator scores, with indicators equally weighted. Topic scores range from 0-3, where 0 indicates the best outcome and 3 indicates the worst outcome (Figure 47). Indicators may be categorized into more than one topic area.

Figure 46. Secondary Data Scoring

Figure 47. Score Range

- Score Range
- Better
- Worse
- 0
- 1
- 2
- 3

91
Comparison Scores

Up to 7 comparison scores were used to assess the status of Gates County. The possible comparisons are shown in Figure 48 and include a comparison of Gates County to North Carolina counties, all U.S. counties, the North Carolina state value, the U.S. value, Healthy People 2020 targets, Healthy North Carolina 2020 targets, and the trend over time. Availability of each type of comparison varies by indicator and is dependent upon the data source, comparability with data collected for other communities, and changes in methodology over time. The determination of comparison scores for each type of comparison is discussed in more detail below.

Comparison to a Distribution of North Carolina Counties and U.S. Counties
For ease of interpretation and analysis, indicator data on HealthENC.org is visually represented as a green-yellow-red gauge showing how Gates County is faring against a distribution of counties in North Carolina or the U.S. (Figure 49).

A distribution is created by taking all county values within the state or nation, ordering them from low to high, and dividing them into four equally sized groups based on their order (Figure 50). The comparison score is determined by how Gates County falls within these four groups or quartiles.

Comparison to North Carolina Value and U.S. Value
As shown in Figure 51, the diamond represents how Gates County compares to the North Carolina state value and the national value. When comparing to a single value, the comparison score is determined by how much better or worse the county value is relative to the comparison value.

Comparison to Healthy People 2020 and Healthy North Carolina 2020 Targets
As shown in Figure 52, the circle represents how Gates County compares to a target value. Two target values are taken into consideration for this analysis: Healthy People 2020 and Healthy North Carolina
Healthy People 2020 goals are national objectives for improving the health of the nation set by the Department of Health and Human Services’ (DHHS) Healthy People Initiative. Healthy North Carolina 2020 objectives provide a common set of health indicators that the state can work to improve. The North Carolina Institute of Medicine, in collaboration with the Governor’s Task Force for Healthy Carolinians; the Division of Public Health, North Carolina Department of Health and Human Services (NC DHHS); the Office of Healthy Carolinians and Health Education, NC DHHS; and the State Center for Health Statistics, NC DHHS, helped lead the development of the Healthy NC 2020 objectives. When comparing to a target, the comparison score is determined by whether the target is met or unmet, and the percent difference between the indicator value and the target value.

**Trend Over Time**
As shown in Figure 53, the square represents the measured trend. The Mann-Kendall statistical test for trend is used to assess whether the value for Gates County is increasing or decreasing over time and whether the trend is statistically significant. The trend comparison uses the four most recent comparable values for the county, and statistical significance is determined at the 90% confidence level. For each indicator with values available for four time periods, a comparison score is determined by the trend’s direction and its statistical significance.

**Missing Values**
Indicator scores are calculated using the comparison scores, availability of which depends on the data source. If an indicator does not have data for a specific comparison type that is included for indicator score calculations, the missing comparison is substituted with a neutral score. When information is unknown due to lack of comparable data, the neutral value assumes that the missing comparison score is neither good nor bad and does not impact the indicator’s weighted average.

**Indicator Scoring**
Indicator scores are calculated as a weighted average of all included comparison scores. If none of the included comparison types are possible for an indicator, no score is calculated, and the indicator is excluded from the data scoring results.

**Topic Scoring**
Indicator scores are averaged by topic area to calculate topic scores. Each indicator may be included in up to three topic areas if appropriate. Resulting scores range from 0-3, where a higher score indicates a

---

2 For more information on Healthy People 2020, see [https://www.healthypeople.gov/](https://www.healthypeople.gov/)
3 For more information on Healthy North Carolina 2020, see: [https://publichealth.nc.gov/hnc2020/](https://publichealth.nc.gov/hnc2020/)
greater level of need as evidenced by the data. A topic score is only calculated if it includes at least three indicators.

**Age, Gender and Race/Ethnicity Disparities**

When a given indicator has data available for population subgroups – such as age, gender and race/ethnicity – and values for these subgroups include confidence intervals, we are able to determine if there is a significant difference between the subgroup’s value and the overall value. A significant difference is defined as two values with non-overlapping confidence intervals. Confidence intervals are not available for all indicators. In these cases, disparities cannot be determined because there is not enough data to conclude whether two values are significantly different from each other.
Table 20 shows the Topic Scores for Gates County, with higher scores indicating a higher need.

Appendix B. Primary Data

Primary data used in this assessment was collected through a community survey and focus groups. The survey instruments and focus group questions are provided in this Appendix:

- English Survey
- Spanish Survey
- Focus Group Questions
Welcome to the Community Health Survey for Eastern North Carolina!

We are conducting a Community Health Assessment for your county. This assessment is being undertaken by a partnership of 33 counties, hospitals, health systems, and health departments in Eastern North Carolina. It allows these partners to better understand the health status and needs of the community they serve and use the knowledge gained to implement programs that will benefit the community.

We can better understand community needs by gathering voices from the community. This survey allows community members like you to tell us about what you feel are important issues for your community. We estimate that it will take about 20 minutes to complete this ~60 question survey. Your answers to these questions will be kept confidential and anonymous.

Thank you very much for your input and your time! If you have questions about this survey, please contact Will Broughton at will.broughton@foundationhli.org.

Part 1: Quality of Life

First, tell us a little bit about yourself...

1. Where do you currently live?

ZIP/Postal Code
2. What county do you live in?

- Beaufort
- Bertie
- Bladen
- Camden
- Carteret
- Chowan
- Cumberland
- Currituck
- Dare
- Duplin
- Edgecombe
- Franklin
- Gates
- Greene
- Halifax
- Hertford
- Hoke
- Hyde
- Johnston
- Lenoir
- Martin
- Nash
- Onslow
- Pamlico
- Pasquotank
- Pender
- Perquimans
- Pitt
- Sampson
- Tyrrell
- Washington
- Wayne
- Wilson

North Carolina County Map
3. Think about the county that you live in. Please tell us whether you “strongly disagree”, “disagree”, “neutral”, “agree” or “strongly agree” with each of the next 9 statements.

PART 2: Community Improvement

The next set of questions will ask about community problems, issues, and services that are important to you. Remember your choices will not be linked to you in any way.

4. Please look at this list of community issues. In your opinion, which one issue most affects the quality of life in this County? (Please choose only one.)

- Pollution (air, water, land)
- Dropping out of school
- Low income/poverty
- Homelessness
- Lack of/inadequate health insurance
- Discrimination/ racism
- Lack of community support
- Drugs (Substance Abuse)
- Domestic violence
- Violent crime (murder, assault)
- Theft
- Rape/sexual assault
- Neglect and abuse
- Elder abuse
- Child abuse
- Other (please specify)
5. In your opinion, which one of the following services needs the most improvement in your neighborhood or community? (Please choose only one.)

- Animal control
- Child care options
- Elder care options
- Services for disabled people
- More affordable health services
- Better/ more healthy food choices
- More affordable/better housing
- Number of health care providers
- Culturally appropriate health services
- Counseling/ mental health/ support groups
- Better/ more recreational facilities (parks, trails, community centers)
- Healthy family activities
- Positive teen activities
- Transportation options
- Availability of employment
- Higher paying employment
- Road maintenance
- Road safety
- None
- Other (please specify)
PART 3: Health Information

Now we’d like to hear more about where you get health information...

6. In your opinion, which one health behavior do people in your own community need more information about? (Please suggest only one.)

- Eating well/nutrition
- Using child safety car seats
- Substance abuse prevention (ex: drugs and alcohol)
- Exercising/fitness
- Using seat belts
- Suicide prevention
- Managing weight
- Driving safely
- Stress management
- Going to a dentist for check-ups/preventive care
- Quitting smoking/tobacco use prevention
- None
- Getting prenatal care during pregnancy
- Child care/parenting
- Anger management
- Going to the doctor for yearly check-ups and screenings
- Elder care
- Domestic violence prevention
- Getting flu shots and other vaccines
- Caring for family members with special needs/disabilities
- Crime prevention
- Preparing for an emergency/disaster
- Preventing pregnancy and sexually transmitted disease (safe sex)
- Rape/sexual abuse prevention
- Other (please specify)
- None
7. Where do you get most of your health-related information? *(Please choose only one.)*

- [ ] Friends and family
- [ ] Internet
- [ ] Employer
- [ ] Doctor/nurse
- [ ] My child’s school
- [ ] Help lines
- [ ] Pharmacist
- [ ] Hospital
- [ ] Books/magazines
- [ ] Church
- [ ] Health department
- [ ] Other (please specify)
8. What health topic(s)/disease(s) would you like to learn more about?

9. Do you provide care for an elderly relative at your residence or at another residence? (Choose only one.)

☐ Yes
☐ No

10. Do you have children between the ages of 9 and 19 for whom you are the caretaker? (Includes step-children, grandchildren, or other relatives.) (Choose only one.)

☐ Yes
☐ No (if No, skip to question #12)

11. Which of the following health topics do you think your child/children need(s) more information about? (Check all that apply.)

☐ Dental hygiene
☐ Nutrition
☐ Eating disorders
☐ Fitness/Exercise
☐ Asthma
☐ Diabetes management
☐ Tobacco
☐ STDs (Sexually Transmitted Diseases)
☐ Sexual intercourse
☐ Alcohol
☐ Drug abuse management
☐ Reckless driving/speeding
☐ Mental health issues
☐ Suicide prevention

☐ Other (please specify)
PART 4: Personal Health

These next questions are about your own personal health. Remember, the answers you give for this survey will not be linked to you in any way.

12. Would you say that, in general, your health is... *(Choose only one.)*

- [ ] Excellent
- [ ] Very Good
- [ ] Good
- [ ] Fair
- [ ] Poor
- [ ] Don’t know/not sure

13. Have you ever been told by a doctor, nurse, or other health professional that you have any of the following health conditions?

<table>
<thead>
<tr>
<th>Condition</th>
<th>Yes</th>
<th>No</th>
<th>Don’t Know</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Cancer</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
14. Which of the following preventive services have you had in the past 12 months? (Check all that apply.)

- [ ] Mammogram
- [ ] Prostate cancer screening
- [ ] Colon/rectal exam
- [ ] Blood sugar check
- [ ] Cholesterol check
- [ ] Hearing screening
- [ ] Bone density test
- [ ] Physical exam
- [ ] Pap smear screening
- [ ] Flu shot
- [ ] Blood pressure check
- [ ] Skin cancer screening
- [ ] Vision screening
- [ ] Cardiovascular screening
- [ ] Dental cleaning/X-rays
- [ ] None of the above

15. About how long has it been since you last visited a dentist or dental clinic for any reason? Include visits to dental specialists, such as orthodontists. (Choose only one.)

- [ ] Within the past year (anytime less than 12 months ago)
- [ ] Within the past 2 years (more than 1 year but less than 2 years ago)
- [ ] Within the past 5 years (more than 2 years but less than 5 years ago)
- [ ] Don’t know/not sure
- [ ] Never

16. In the past 30 days, have there been any days when feeling sad or worried kept you from going about your normal activities? (Choose only one.)

- [ ] Yes
- [ ] No
- [ ] Don’t know/not sure

17. The next question is about alcohol. One drink is equivalent to a 12-ounce beer, a 5 ounce glass of wine, or a drink with one shot of liquor.
Considering all types of alcoholic beverages, how many times during the past 30 days did you have 5 or more drinks (if male) or 4 or more drinks (if female) on an occasion?

- 0
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12

- 24
- 25
- 26
- 27
- 28
- 29
- 30
- Don’t know / not sure

18. Now we will ask a question about drug use. The answers that people give us about their use of drugs are important for understanding health issues in the county. We know that this information is personal, but remember your answers will be kept confidential.

Have you used any illegal drugs within the past 30 days? When we say illegal drugs this includes marijuana, cocaine, crack cocaine, heroin, or any other illegal drug substance. On about how many days have you used one of these drugs? (Choose only one.)

- 0
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- 11
- 12

- 23
- 24
- 25
- 26
- 27
- 28
- 29
- 30
- Don’t know / not sure

*(if you responded 0, skip to question #20)*

19. During the past 30 days, which illegal drug did you use? (Check all that apply.)

- Marijuana
- Cocaine
- Heroin
- Other (please specify)
20. During the past 30 days, have you taken any prescription drugs that you did not have a prescription for (such as Oxycontin, Percocet, Demerol, Adderall, Ritalin, or Xanax)? How many times during the past 30 days did you use a prescription drug that you did not have a prescription for? (Choose only one.)

☐ 0  ☐ 4  ☐ 8  ☐ 12  ☐ 16  ☐ 20  ☐ 24  ☐ 28
☐ 1  ☐ 5  ☐ 9  ☐ 13  ☐ 17  ☐ 21  ☐ 25  ☐ 29
☐ 2  ☐ 6  ☐ 10  ☐ 14  ☐ 18  ☐ 22  ☐ 26  ☐ 30
☐ 3  ☐ 7  ☐ 11  ☐ 15  ☐ 19  ☐ 23  ☐ 27

☐ Don’t know / not sure
21. The next question relates to veteran's health. Have you ever served on active duty in the US Armed Forces (not including active duty only for training in the Reserves or National Guard)? (Choose only one.)

☐ Yes
☐ No (if No, skip to question #23)

22. Has a doctor or other health professional ever told you that you have depression, anxiety, or post traumatic stress disorder (PTSD)? (Choose only one.)

☐ Yes
☐ No

23. Now we'd like to know about your fitness. During a normal week, other than in your regular job, do you engage in any physical activity or exercise that lasts at least a half an hour? (Choose only one.)

☐ Yes
☐ No (if No, skip to question #26)
☐ Don’t know/not sure (if Don’t know/not sure, skip to question #26)

24. Since you said yes, how many times do you exercise or engage in physical activity during a normal week?

25. Where do you go to exercise or engage in physical activity? *Check all that apply.*

- [ ] YMCA
- [ ] Park
- [ ] Public Recreation Center
- [ ] Private Gym
- [ ] Other (please specify)

Since you responded "YES" to #23 (physical activity/exercise), skip to question #27.

26. Since you said "no", what are the reasons you do not exercise for at least a half hour during a normal week? You can give as many of these reasons as you need to.

- [ ] My job is physical or hard labor
- [ ] Exercise is not important to me.
- [ ] I don't have access to a facility that has the things I need, like a pool, golf course, or a track.
- [ ] I don't have enough time to exercise.
- [ ] I would need child care and I don't have it.
- [ ] I don't know how to find exercise partners.
- [ ] I don't like to exercise.
- [ ] It costs too much to exercise.
- [ ] There is no safe place to exercise.
- [ ] I would need transportation and I don't have it.
- [ ] I'm too tired to exercise.
- [ ] I'm physically disabled.
- [ ] I don't know how to answer this question.
☐ Other (please specify)
27. Not counting lettuce salad or potato products such as french fries, think about how often you eat fruits and vegetables in an average week.

How many cups per week of fruits and vegetables would you say you eat? *(One apple or 12 baby carrots equal one cup.)*

- Number of Cups of Fruit
- Number of Cups of Vegetables
- Number of Cups of 100% Fruit Juice

28. Have you ever been exposed to secondhand smoke in the past year? *(Choose only one.)*

- Yes
- No *(if No, skip to question #30)*
- Don’t know/not sure *(if Don’t know/not sure, skip to question #30)*

29. If yes, where do you think you are exposed to secondhand smoke most often? *(Check only one.)*

- Home
- Workplace
- Hospitals
- Restaurants
- School
- I am not exposed to secondhand smoke.
- Other (please specify)
30. Do you currently use tobacco products? (This includes cigarettes, electronic cigarettes, chewing tobacco and vaping.) *(Choose only one.)*

☐ Yes  
☐ No *(if No, skip to question #32)*

31. If yes, where would you go for help if you wanted to quit? *(Choose only one.)*

☐ Quit Line NC  ☐ Health Department  
☐ Doctor  ☐ I don't know  
☐ Pharmacy  ☐ Not applicable; I don't want to quit  
☐ Private counselor/therapist  
☐ Other (please specify)

32. Now we will ask you questions about your personal flu vaccines. An influenza/flu vaccine can be a "flu shot" injected into your arm or spray like "FluMist" which is sprayed into your nose. During the past 12 months, have you had a seasonal flu vaccine? *(Choose only one.)*

☐ Yes, flu shot
☐ Yes, flu spray
☐ Yes, both
☐ No
☐ Don’t know/not sure
Part 5: Access to Care/Family Health

33. Where do you go most often when you are sick? (Choose only one.)

- [ ] Doctor’s office
- [ ] Health department
- [ ] Hospital
- [ ] Medical clinic
- [ ] Urgent care center
- [ ] Other (please specify)

34. Do you have any of the following types of health insurance or health care coverage? (Choose all that apply.)

- [ ] Health insurance my employer provides
- [ ] Health insurance my spouse’s employer provides
- [ ] Health insurance my school provides
- [ ] Health insurance my parent or my parent’s employer provides
- [ ] Health insurance I bought myself
- [ ] Health insurance through Health Insurance Marketplace (Obamacare)
- [ ] The military, Tricare, or the VA
- [ ] Medicaid
- [ ] Medicare
- [ ] No health insurance of any kind
35. In the past 12 months, did you have a problem getting the health care you needed for you personally or for a family member from any type of health care provider, dentist, pharmacy, or other facility? *(Choose only one.)*

☐ Yes

☐ No  *(if No, skip to question #38)*

☐ Don’t know/not sure

36. Since you said "yes," what type of provider or facility did you or your family member have trouble getting health care from? You can choose as many of these as you need to.

☐ Dentist

☐ General practitioner

☐ Eye care/ optometrist/ ophthalmologist

☐ Pharmacy/ prescriptions

☐ Pediatrician

☐ OB/GYN

☐ Health department

☐ Hospital

☐ Urgent Care Center

☐ Medical Clinic

☐ Specialist

☐ Other (please specify)

37. Which of these problems prevented you or your family member from getting the necessary health care? You can choose as many of these as you need to.

☐ No health insurance.

☐ Insurance didn’t cover what I/we needed.
☐ My/our share of the cost (deductible/co-pay) was too high.
☐ Doctor would not take my/our insurance or Medicaid.
☐ Hospital would not take my/our insurance.
☐ Pharmacy would not take my/our insurance or Medicaid.
☐ Dentist would not take my/our insurance or Medicaid.
☐ No way to get there.
☐ Didn’t know where to go.
☐ Couldn’t get an appointment.
☐ The wait was too long.
☐ The provider denied me care or treated me in a discriminatory manner because of my HIV status, or because I am an LGBT individual.
38. In what county are most of the medical providers you visit located? (Choose only one.)

[ ] Beaufort [ ] Martin [ ] Pitt
[ ] Bertie [ ] Edgecombe [ ] Moore [ ] Richmond
[ ] Bladen [ ] Franklin [ ] Nash [ ] Robeson
[ ] Brunswick [ ] Gates [ ] New [ ] Sampson
[ ] Camden [ ] Granville [ ] Hanover [ ] Scotland
[ ] Carteret [ ] Greene [ ] [ ] Tyrrell
[ ] Chowan [ ] Halifax [ ] Northampton [ ] Vance
[ ] Columbus [ ] Harnett [ ] Onslow [ ] Wake
[ ] Craven [ ] Hertford [ ] Pamlico [ ] Warren
[ ] [ ] Hoke [ ] [ ] [ ] Washington
[ ] Cumberland [ ] Hyde [ ] Pasquotank [ ] Wayne
[ ] Currituck [ ] Johnston [ ] Pender [ ] Wilson
[ ] Dare [ ] Jones [ ] [ ] The State of
[ ] Duplin [ ] Lenoir [ ] Perquimans [ ] Virginia
[ ] Other (please specify)

North Carolina County Map
39. In the previous 12 months, were you ever worried about whether your family's food would run out before you got money to buy more? *(Choose only one.)*

- [ ] Yes
- [ ] No
- [ ] Don’t know/not sure

40. If a friend or family member needed counseling for a mental health or a drug/alcohol abuse problem, who is the first person you would tell them to talk to? *(Choose only one.)*

- [ ] Private counselor or therapist
- [ ] Support group (e.g., AA, Al-Anon)
- [ ] School counselor
- [ ] Other (please specify)
- [ ] Don't know
- [ ] Doctor
- [ ] Pastor/Minister/Clergy
Part 6: Emergency Preparedness

41. Does your household have working smoke and carbon monoxide detectors? *(Choose only one.)*

- [ ] Yes, smoke detectors only
- [ ] Yes, both
- [ ] Don’t know/not sure
- [ ] Yes, carbon monoxide detectors only
- [ ] No

42. Does your family have a basic emergency supply kit? *(These kits include water, non-perishable food, any necessary prescriptions, first aid supplies, flashlight and batteries, non-electric can opener, blanket, etc.)*

- [ ] Yes
- [ ] No
- [ ] Don’t know/not sure

If yes, how many days do you have supplies for? *(Write number of days)*

43. What would be your main way of getting information from authorities in a large-scale disaster or emergency? *(Check only one.)*

- [ ] Television
- [ ] Radio
- [ ] Internet
- [ ] Telephone (landline)
- [ ] Cell Phone
- [ ] Print media (ex: newspaper)
- [ ] Social networking site
- [ ] Neighbors
- [ ] Family
- [ ] Text message (emergency alert system)
- [ ] Don’t know/not sure
44. If public authorities announced a mandatory evacuation from your neighborhood or community due to a large-scale disaster or emergency, would you evacuate? *(Check only one.)*

☐ Yes *(if Yes, skip to question #46)*

☐ No

☐ Don’t know/not sure

45. What would be the main reason you might not evacuate if asked to do so? *(Check only one.)*

☐ Lack of transportation

☐ Lack of trust in public officials

☐ Concern about leaving property behind

☐ Concern about personal safety

☐ Concern about family safety

☐ Concern about leaving pets

☐ Concern about traffic jams and inability to get out

☐ Health problems (could not be moved)

☐ Don’t know/not sure

☐ Other (please specify)
Part 7: Demographic Questions

The next set of questions are general questions about you, which will only be reported as a summary of all answers given by survey participants. Your answers will remain anonymous.

46. How old are you? *(Choose only one.)*

<table>
<thead>
<tr>
<th></th>
<th>15-19</th>
<th>40-44</th>
<th>65-69</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>20-24</td>

<td>80-84</td>
</tr>
<tr>
<td></td>
<td>35-39</td>
<td>60-64</td>
<td>85 or older</td>
</tr>
</tbody>
</table>

47. What is your gender? *(Choose only one.)*

- Male
- Female
- Transgender
- Gender non-conforming
- Other

48. Are you of Hispanic, Latino, or Spanish origin? *(Choose only one).*

- I am not of Hispanic, Latino or Spanish origin
- Mexican, Mexican American, or Chicano
- Puerto Rican
- Cuban or Cuban American
- Other Hispanic or Latino (please specify)
49. **What is your race? (Choose only one).**

- [ ] White or Caucasian
- [ ] Black or African American
- [ ] American Indian or Alaska Native
- [ ] Asian Indian
- [ ] Other Asian including Japanese, Chinese, Korean, Vietnamese, and Filipino/a
- [ ] Other Pacific Islander including Native Hawaiian, Samoan, Guamanian/Chamorro
- [ ] Other race not listed here (please specify)

50. **Is English the primary language spoken in your home? (Choose only one.)**

- [ ] Yes
- [ ] No. If no, please specify the primary language spoken in your home.

51. **What is your marital status? (Choose only one.)**

- [ ] Never married/single
- [ ] Married
- [ ] Unmarried partner
- [ ] Divorced
- [ ] Widowed
- [ ] Separated
Other (please specify)
52. Select the highest level of education you have achieved. *(Choose only one.)*

- [ ] Less than 9th grade
- [ ] 9-12th grade, no diploma
- [ ] High School graduate (or GED/equivalent)
- [ ] Associate's Degree or Vocational Training
- [ ] Some college (no degree)
- [ ] Bachelor's degree
- [ ] Graduate or professional degree
- [ ] Other (please specify)

53. What was your total household income last year, before taxes? *(Choose only one.)*

- [ ] Less than $10,000
- [ ] $10,000 to $14,999
- [ ] $15,000 to $24,999
- [ ] $25,000 to $34,999
- [ ] $35,000 to $49,999
- [ ] $50,000 to $74,999
- [ ] $75,000 to $99,999
- [ ] $100,000 or more

54. Enter the number of individuals in your household (including yourself).

55. What is your employment status? *(Check all that apply.)*

- [ ] Employed full-time
- [ ] Employed part-time
- [ ] Retired
- [ ] Armed forces
- [ ] Disabled
- [ ] Student
☐ Homemaker
☐ Self-employed
☐ Unemployed for 1 year or less
☐ Unemployed for more than 1 year
56. Do you have access to the Internet at home (including broadband, wifi, dial-up or cellular data)?
(Choose only one.)

☐ Yes
☐ No
☐ Don’t know/not sure

57. (Optional) Is there anything else you would like us to know about your community? Please feel free to tell us below.

Thank you for your time and participation!

If you have questions about this survey, please contact us at will.broughton@foundationhli.org.
Encuesta de salud de la comunidad del Este de Carolina del Norte 2018

¡Bienvenido a la encuesta de salud comunitaria para el Este de Carolina del Norte!

Estamos llevando a cabo una evaluación de salud comunitaria para su condado. Esta evaluación está siendo realizada por una asociación de 33 condados, hospitales, sistemas de salud y departamentos de salud en el Este de Carolina del Norte. Esta evaluación les permite a estos socios comprender mejor el estado de salud y las necesidades de la comunidad a la que sirven y utilizar el conocimiento adquirido para implementar programas que beneficiarán a esta comunidad.

Podemos entender mejor las necesidades de la comunidad reuniendo las voces de los miembros de su comunidad. Esta evaluación permite que los miembros de la comunidad como usted, nos cuente sobre lo que considera son asuntos importantes para su comunidad. De antemano le agradecemos por los 20 minutos que tomará completar esta encuesta de 57 preguntas. Sus respuestas a estas preguntas se mantendrán confidenciales y anónimas.

¡Muchas gracias por su aporte y su tiempo! Si tiene preguntas sobre esta encuesta, puede enviar un correo electrónico a Will Broughton en will.broughton@foundationhli.org.

---

PARTE 1: Calidad de vida

Primero, cuéntanos un poco sobre usted:

3. ¿Dónde vive actualmente?

Código postal

[Input Box]
4. ¿En qué condado vive?

☐ Beaufort ☐ Franklin ☐ Onslow
☐ Bertie ☐ Gates ☐ Pamlico
☐ Bladen ☐ Greene ☐ Pasquotank
☐ Camden ☐ Halifax ☐ Pender
☐ Carteret ☐ Hertford ☐ Perquimans
☐ Chowan ☐ Hoke ☐ Pitt
☐ Cumberland ☐ Hyde ☐ Sampson
☐ Currituck ☐ Johnston ☐ Tyrrell
☐ Dare ☐ Lenoir ☐ Washington
☐ Duplin ☐ Martin ☐ Wayne
☐ Edgecombe ☐ Nash ☐ Wilson

PARTE 2: Mejora de la comunidad

La siguiente serie de preguntas le preguntará sobre problemas y servicios de la comunidad que son importantes para usted. Recuerde que sus respuestas son privadas y no serán relacionadas con usted en ninguna manera.

4. Mire esta lista de problemas de la comunidad. En su opinión, ¿qué problema afecta más la calidad de vida en este condado? *(Elija solo una respuesta)*

- [ ] Contaminación (aire, agua, tierra)
- [ ] Abandono de la escuela
- [ ] Bajos ingresos / pobreza
- [ ] Falta de hogar
- [ ] Falta de un seguro de salud adecuado
- [ ] Desesperación
- [ ] Otros (especificar)

- [ ] Discriminación / racismo
- [ ] Falta de apoyo de la comunidad
- [ ] Drogas (Abuso de sustancias)
- [ ] Descuido y abuso de personas mayores
- [ ] Maltrato a personas mayores
- [ ] Abuso infantil

- [ ] Violencia doméstica
- [ ] Delito violento (asesinato, asalto)
- [ ] Robo
- [ ] Violación / agresión sexual
5. En su opinión, ¿cuál de los siguientes servicios necesita la mayor mejoría en su vecindario o comunidad? (Por favor elija solo uno)

- Control Animal
- Opciones de cuidado infantil
- Opciones de cuidado para ancianos
- Servicios para personas con discapacidad
- Servicios de salud más accesibles
- Mejores y más opciones de alimentos saludables
- Más accesibilidad / mejores vivienda
- Número de proveedores de atención médica
- Servicios de salud apropiados de acuerdo a su cultura
- Consejería / salud mental / grupos de apoyo
- Mejores y más instalaciones recreativas (parques, senderos, centros comunitarios)
- Actividades familiares saludables
- Actividades positivas para adolescentes
- Opciones de transporte
- Disponibilidad de empleo
- Empleos mejor pagados
- Mantenimiento de carreteras
- Carreteras seguras
- Ninguna

Otros (especificar)

---

148
Ahora nos gustaría saber un poco más sobre dónde usted obtiene información de salud.

6. En su opinión, ¿sobre qué área de salud necesitan más información las personas de su comunidad? (Por favor sugiera solo uno)

☐ Comer bien / nutrición
☐ Ejercicio
☐ Manejo del peso
☐ Ir a un dentista para chequeos / cuidado preventivo
☐ Ir al médico para chequeos y exámenes anuales
☐ Obtener cuidado prenatal durante el embarazo
☐ Recibir vacunas contra la gripe y otras vacunas
☐ Prepararse para una emergencia / desastre
☐ Usar asientos de seguridad para niños
☐ Usar cinturones de seguridad
☐ Conducir cuidadosamente
☐ Dejar de fumar / prevención del uso de tabaco
☐ Cuidado de niños / crianza
☐ Cuidado de ancianos
☐ Cuidado de miembros de familia con necesidades especiales o discapacidades
☐ Prevención del embarazo y enfermedades de transmisión sexual (sexo seguro)
☐ Prevención del abuso de sustancias (por ejemplo, drogas y alcohol)
☐ Prevención del suicidio
☐ Manejo del estrés
☐ Control de la ira/enojo
☐ Prevención de violencia doméstica
☐ Prevención del crimen
☐ Violación / prevención de abuso sexual
☐ Ninguna
Otros (especificar)
7. De dónde saca la mayor parte de su información relacionada con la salud? *(Por favor elija solo una respuesta)*

- [ ] Amigos y familia
- [ ] La escuela de mi hijo
- [ ] Líneas telefónicas de ayuda
- [ ] Doctor / enfermera
- [ ] Farmacéutico
- [ ] Hospital
- [ ] Departamento de salud
- [ ] Iglesia
- [ ] Internet
- [ ] Empleador
- [ ] Otros (especificar)

8. ¿De qué temas o enfermedades de salud le gustaría aprender más?

9. ¿Cuida de un pariente anciano en su casa o en otra casa? *(Elija solo una).*

- [ ] Sí
- [ ] No

10. ¿Tiene hijos entre las edades de 9 y 19 de los cuales usted es el guardián? (Incluye hijastros, nietos u otros parientes). *(Elija solo una).*

- [ ] Sí
- [ ] No *(Si su respuesta es No, salte a la pregunta número 12)*
11. ¿Cuáles de los siguientes temas de salud cree que sus hijos necesitan más información? (Seleccione todas las opciones que corresponden).

☐ Higiene dental ☐ Manejo de la diabetes ☐ Abuso de drogas
☐ Nutrición ☐ Tabaco ☐ Manejo imprudente / exceso de velocidad
☐ Trastornos de la alimentación ☐ ETS ☐ Problemas de salud mental
☐ Ejercicios ☐ (enfermedades de transmisión sexual) ☐ Prevención del suicidio
☐ Manejo del asma ☐ Relación sexual ☐ Alcohol
☐ Otros (especificar)
PARTE 4: Salud personal

Las siguientes preguntas son sobre su salud personal. Recuerde, las respuestas que brinde para esta encuesta no serán ligadas con usted de ninguna manera.

12. En general, diría que su salud es... *(Elija solo una).*

- [ ] Excelente
- [ ] Muy buena
- [ ] Buena
- [ ] Justa
- [ ] Pobre
- [ ] No sé / no estoy seguro

13. ¿Alguna vez un médico, enfermera u otro profesional de la salud le dijo que tiene alguna de las siguientes condiciones de salud?

<table>
<thead>
<tr>
<th></th>
<th>Sí</th>
<th>No</th>
<th>No lo sé</th>
</tr>
</thead>
<tbody>
<tr>
<td>Asma</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

<tr>
<td>Cáncer</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
14. ¿Cuál de los siguientes servicios preventivos ha tenido usted en los últimos 12 meses? *(Seleccione todas las opciones que correspondan).*

- [ ] Mamografía
- [ ] Examen de cáncer de próstata
- [ ] Examen de colon / recto
- [ ] Control de azúcar en la sangre
- [ ] Examen de Colesterol
- [ ] Control de la audición (escucha)
- [ ] Prueba de densidad de los huesos
- [ ] Examen físico
- [ ] Prueba de Papanicolaou
- [ ] Vacuna contra la gripe
- [ ] Prueba de Pruebas de cáncer de piel
- [ ] Examen de la vista
- [ ] Evaluación cardiovascular (el corazón)
- [ ] Limpieza dental / radiografías
- [ ] Ninguna de las anteriores

15. ¿Cuánto tiempo hace desde la última vez que visitó a un dentista o clínica dental por algún motivo? Incluya visitas a especialistas dentales, como ortodoncista. *(Elija solo una).*

- [ ] En el último año (en los últimos 12 meses)
- [ ] Hace 2 (más de un año pero menos de dos años)
- [ ] Hace más de 5 años (más de 2 años pero menos de 5 años)
- [ ] No sé / no estoy seguro
- [ ] Nunca

16. En los últimos 30 días, ¿ha habido algún día que se ha sentido triste o preocupado y le haya impedido realizar sus actividades normales? *(Elija solo una).*

- [ ] Sí
No
No sé / no estoy seguro
17. La siguiente pregunta es sobre el alcohol. Un trago es equivalente a una cerveza de 12 onzas, una copa de vino de 5 onzas o una bebida con un trago de licor.

Considerando todos los tipos de bebidas alcohólicas, ¿cuántas veces durante los últimos 30 días tomó 5 o más bebidas (si es hombre) o 4 o más bebidas (si es mujer) en una ocasión?

- [ ] 29
- [ ] 30
- [ ] No sé / no estoy seguro

21. La siguiente pregunta se relaciona con la salud de una persona que ha servido en las fuerzas Armadas. ¿Alguna vez ha estado en servicio activo en las Fuerzas Armadas de los Estados Unidos (Sin incluir el servicio activo de solo entrenamientos en las Reservas o la Guardia Nacional)? (*Elija solo una*).

- [ ] Sí
- [ ] No  (*Si su respuesta es No, salte a la pregunta número 23*)

22. ¿Alguna vez un médico u otro profesional de la salud le ha dicho que tiene depresión, ansiedad o trastorno por estrés postraumático (TEPT)? (*Elija solo una*).

- [ ] Sí
- [ ] No
23. Ahora nos gustaría saber sobre su estado físico. Durante una semana normal, aparte de su trabajo habitual, ¿realiza alguna actividad física o ejercicio que dure al menos media hora? (*Elija solo una*).

☐ Sí

☐ No (*) (*Si su respuesta es No, salte a la pregunta numero 26*)

☐ No sé / no estoy seguro (*) (*Si su respuesta es No se / no estoy seguro, salte a la pregunta numero 26*)

24. Como dijo que sí, ¿cuántas veces hace ejercicio o se involucra en alguna actividad física durante una semana normal?

25. ¿A dónde va a hacer ejercicio o participa en actividad físicas? (Marque todas las que corresponden).

- YMCA
- Parque
- Centro de Recreación Pública
- Gimnasio privado
- Otros (especificar)

- Sitio de trabajo / Empleador
- Terrenos escolares / instalaciones
- Casa
- Iglesia

Como su respuesta fue Si a la pregunta 23 (actividad física / ejercicio), salte a la pregunta numero 27

26. Ya que dijo "no", ¿cuáles son las razones por las que no hace ejercicio por media hora durante una semana normal? Puedes dar tantos de estos motivos como necesite.

- Mi trabajo es trabajo físico o trabajo duro
- El ejercicio no es importante para mí.
- No tengo acceso a una instalación que tenga las cosas que necesito, como una piscina, un campo de golf o una pista.
- No tengo suficiente tiempo para hacer ejercicio.
- Necesitaría cuidado de niños y no lo tengo.
- No sé cómo encontrar compañeros de ejercicio.
- No me gusta hacer ejercicio
- Me cuesta mucho hacer ejercicio.
- No hay un lugar seguro para hacer ejercicio.
Necesito transporte y no lo tengo.
Estoy demasiado cansado para hacer ejercicio.
Estoy físicamente deshabilitado.
No lo sé.

Otros (especificar)
27. Sin contar ensalada de lechuga o productos de papa como papas fritas, piense en la frecuencia con la que come frutas y verduras en una semana normal.

¿Cuántas tazas por semana de frutas y vegetales dirías que comes? (Una manzana o 12 zanahorias pequeñas equivalen a una taza).

<table>
<thead>
<tr>
<th>Cantidad de tazas de fruta</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Número de tazas de verduras</td>
<td></td>
</tr>
<tr>
<td>Cantidad de tazas de jugo de fruta 100%</td>
<td></td>
</tr>
</tbody>
</table>

28. ¿Alguna vez estuvo expuesto al humo del cigarro de alguien que fumó cerca de usted durante el último año? (Elija solo una).

- [ ] Sí
- [x] No (Si su respuesta es No, salte a la pregunta numero 30)
- [ ] No sé / no estoy seguro (Si su respuesta es No se / no estoy seguro, salte a la pregunta numero 30)

29. En caso afirmativo, ¿dónde cree que está expuesto al humo de segunda mano con mayor frecuencia? (Marque solo uno)

- [ ] Casa
- [ ] Lugar de trabajo
- [ ] Hospitales
- [ ] Restaurantes
- [ ] Colegio
- [x] No estoy expuesto al humo de segunda mano.
- [ ] Otros (especificar)
30. ¿Actualmente usa algún producto que contiene tabaco? (Esto incluye cigarros, cigarros electrónicos, masticar tabaco o cigarro de vapor.) (Elija solo una).

☐ Sí
☐ No  (Si su respuesta es No, salte a la pregunta número 32)

31. En caso afirmativo, ¿a dónde iría en busca de ayuda si quisiera dejar de fumar? (Elija solo una).

☐ QUITLINE NC (ayuda por teléfono)
☐ Doctor
☐ Farmacia
☐ Consejero / terapeuta privado
☐ Otros (especificar)
☐ Departamento de salud
☐ No lo sé
☐ No aplica; No quiero renunciar

32. Ahora le haremos preguntas sobre sus vacunas personales contra la gripe. Una vacuna contra la influenza / gripe puede ser una "inyección contra la gripe" inyectada en su brazo o también el espray "FluMist" que se rocía en su nariz. Durante los últimos 12 meses, ¿se vacunó contra la gripe o se puso el espray "FluMist"? (Elija solo una).

☐ Sí, vacuna contra la gripe
☐ Sí, FluMist
☐ Si ambos
☐ No
☐ No sé / no estoy seguro
33. ¿A dónde va más a menudo cuando está enfermo? *(Elija solo uno)*

- [ ] Oficina del doctor
- [ ] Departamento de salud
- [ ] Hospital
- [ ] Clínica Médica
- [ ] Centro de cuidado urgente
- [ ] Otros (especificar)

34. ¿Tiene alguno de los siguientes tipos de seguro de salud o cobertura de atención médica? *(Elija todos los que aplique)*

- [ ] Seguro de salud que mi empleador proporciona
- [ ] Seguro de salud que proporciona el empleador de mi cónyuge
- [ ] Seguro de salud que mi escuela proporciona
- [ ] Seguro de salud que proporciona mi padre o el empleador de mis padres
- [ ] Seguro de salud que compré
- [ ] Seguro de salud a través del Mercado de Seguros Médicos (Obamacare)
- [ ] Seguro Militar, Tricare o él VA
- [ ] Seguro de enfermedad
- [ ] Seguro médico del estado
- [ ] Sin plan de salud de ningún tipo
35. En los últimos 12 meses, ¿tuvo problemas para obtener la atención médica que necesitaba para usted o para un familiar de cualquier tipo de proveedor de atención médica, dentista, farmacia u otro centro? (Elija solo uno)

☐ Sí

☐ No (Si su respuesta es No, salte a la pregunta número 38)

☐ No sé / no estoy seguro

36. Dado que usted dijo "sí", ¿Con cual tipo de proveedor o institución tuvo problemas para obtener atención médica? Puede elegir tantos de estos como necesite.

☐ Dentista

☐ Médico general

☐ Cuidado de los ojos / optometrista / oftalmólogo

☐ Farmacia / recetas médicas

☐ Pediatra

☐ Ginecologo

☐ Departamento de salud

☐ Hospital

☐ Centro de atención urgente

☐ Clínica Médica

☐ Especialista

PARTE 7: Preguntas demográficas

La siguiente serie de preguntas son preguntas generales sobre usted, que solo se informarán como un resumen de todas las respuestas dadas por los participantes de la encuesta. Tus respuestas permanecerán en el anonimato.

46. ¿Qué edad tiene? (Elija solo uno)
   - 15-19
   - 20-24
   - 25-29
   - 30-34
   - 35-39
   - 40-44
   - 45-49
   - 50-54
   - 55-59
   - 60-64
   - 65-69
   - 70-74
   - 75-79
   - 80-84
   - 85 o más

47. ¿Cuál es tu género? (Elija solo uno)
   - Masculino
   - Femenino
   - Transgénero
   - Género no conforme
   - Otro

48. ¿Eres de origen hispano, latino o español? (Elija solo uno)
   - No soy de origen hispano, latino o español
   - Mexicano, mexicoamericano o chicano
   - Puertorriqueño
   - Cubano o cubano americano
   - Otro - hispano o latino (por favor especifique)
49. ¿Cuál es su raza? (*Elija solo uno*)

- [ ] Blanco
- [ ] Negro o Afroamericano
- [ ] Indio Americano o nativo de Alaska
- [ ] Indio Asiático
- [ ] Otros- Asiáticos, incluidos Japonés, Chino, Coreano, Vietnamita y Filipino
- [ ] Otros isleños del Pacífico, incluidos los nativos de Hawaii, Samoa, Guamanian / Chamorro
- [ ] Otra raza no incluida aquí (especifique)

50. ¿El inglés es el idioma principal que se habla en su hogar? (*Elija solo uno*)

- [ ] Sí
- [ ] No. En caso negativo, especifique el idioma principal que se habla en su hogar.

51. ¿Cuál es tu estado civil? (*Elija solo uno*)

- [ ] Nunca casado / soltero
- [ ] Casado
- [ ] Pareja- soltera
- [ ] Divorciado
- [ ] Viudo
☐ Separado
☐ Otros (especificar)
52. Seleccione el nivel más alto de educación que ha alcanzado. \textit{(Elija solo uno)}

- ☐ Menos de 9no grado
- ☐ 9-12 grado, sin diploma
- ☐ Graduado de secundaria (o GED / equivalente)
- ☐ Grado Asociado o Formación Profesional
- ☐ Un poco de universidad (sin título)
- ☐ Licenciatura
- ☐ Licenciado o título profesional
- ☐ Otros (especificar)

53. ¿Cuál fue el ingreso total de su hogar el año pasado, antes de impuestos? \textit{(Elija solo uno)}

- ☐ Menos de $10,000
- ☐ $10,000 a $14,999
- ☐ $15,000 a $24,999
- ☐ $25,000 a $34,999
- ☐ $35,000 a $49,999
- ☐ $50,000 a $74,999
- ☐ $75,000 a $99,999
- ☐ $100,000 o más

54. Ingrese el número de personas en su hogar (incluyéndose a usted)

55. ¿Cuál es su estado laboral? \textit{(Seleccione todas las opciones que corresponden).}

- ☐ Empleado de tiempo completo
- ☐ Empleado a tiempo parcial
- ☐ Discapacitado
- ☐ Retirado
- ☐ Estudiante
- ☐ Fuerzas Armadas
Ama de casa  Desempleado 1  Desempleado por más de 1 año
Trabajadores por cuenta propia año o menos año
56. ¿Tiene acceso al internet es su casa (Esto incluye alta velocidad, wifi, acceso telefónico o datos móviles)? (Elija solo uno)

☐ Sí
☐ No
☐ No sé / no estoy seguro

57. (Opcional) ¿Hay algo más que le gustaría que sepamos sobre su comunidad? Por favor, síntase libre de decírnos a continuación.

¡Gracias por su tiempo y participación!

Albemarle Hopeline, Inc.
Albemarle Hopeline, a private, non-profit organization founded in 1981, is the only program of its kind in the Albemarle region, with outreach through four satellite offices (Chowan, Currituck, Gates and Perquimans counties), a shelter/direct service facility, and a thrift store. The agency is guided by the mission of “providing comprehensive direct and preventive services to victims of family violence, sexual assault and teen dating violence” in the counties of Camden, Chowan, Currituck, Gates, Pasquotank and Perquimans.

Services include: 24-hour crisis line; emergency Hope House shelter; food, clothing and transportation; crisis intervention; court advocacy; individual and group counseling for adults and children; Displaced Homemaker Program; information and referral; outreach; and prevention through awareness and education to school, church and civic groups and the community-at-large. Since the opening of an enlarged 14,200 square foot Hope House facility in 2006, Hopeline has been able to consolidate services to both residential and non-residential victims, and improve coordination and effectiveness. All services are designed to meet basic safety needs of victims of domestic and sexual violence, empowering them to establish and maintain healthy, violence-free lives.

Public Health Department:
Albemarle Regional Health Services (ARHS) is a regional Public Health agency in rural, northeastern NC serving the eight counties of Bertie, Camden, Chowan, Currituck, Gates, Hertford, Pasquotank and Perquimans. ARHS has provided over 70 years of service to the Albemarle Region. The regional Public Health agency provides the following healthcare services: immunizations, diabetes care and management, women’s preventive health, maternal health, including high-risk perinatal services, pregnancy care management, child health, WIC and nutrition counseling, pediatric asthma management, services for people with communicable diseases including STDs, HIV disease specialty clinic, adult day health care, behavioral health, children’s developmental services, Public Health preparedness and response, public information, and interpreter assistance. Albemarle Regional Health Services also administers the following programs: Environmental Health, Regional Landfill, Solid Waste Authority and Recycling, LifeQuest Worksite Wellness, and the Inter-County Public Transportation Authority. The more than 29 ARHS operational sites are completely networked by technology to increase the efficiency and effectiveness of service delivery across the agency.

Local Health Department
The Perquimans County Health Department is part of ARHS, a seven-county regional, accredited Public Health Department headquartered in Elizabeth City, NC. The local health department is located in Edenton at 100 W. Freemason Circle. Comprehensive clinical services include Women’s Preventive Health, Adult Health, Communicable Disease programming, Immunizations, School and Community Health Education, Breast and Cervical Cancer Control Program, Diabetes Management, Child Health, WIC, Albemarle Hospice, Albemarle Home Care, Albemarle LifeQuest/Health Promotion, Environmental Health, Preparedness and Response Solid Waste Management Authority, and the Regional Landfill services.
